Massachusetts Municipal Association Partnership Program Application

About the MMA

The Massachusetts Municipal Association is a private, non-profit, nonpartisan organization of cities and towns established in 1979 to improve the effectiveness of local government in the commonwealth. Massachusetts cities and towns are the workhorses of government, delivering essential services to every citizen every single day: police and Fire protection, public education, library programs, road maintenance, safe drinking water, sewer disposal, trash collection and much more.

The MMA serves as an advocate for its members before the Massachusetts Legislature, the administration, regulatory bodies and the courts; develops and pursues a municipal policy that meets present and future needs of their state's communities and the people who live in them; and provides training, news information, insurance, legal aid, policy research and management assistance to municipal officials to help them improve the quality of local government.

Membership Fees

The MMA Partnership Program has been designed for private sector companies who provide products and services to municipalities in the commonwealth. Participating companies have access to the MMA through publications, sponsorship programs and informal networking opportunities.

The MMA Partnership Program for Nonprofits has been designed for non-municipal government agencies or non-profit organizations that support the objectives of cities and towns. For a full listing of Partnership Program benefits, please refer to the previous page.

Please check one:

- Private Sector Partner \$750
- Non-profit Partner \$425
