Remote meeting extension for local boards signed into law

By Ali DiMatteo

On July 16, Lt. Gov. Karyn Polito, as acting governor, signed legislation to extend key pandemic-era accommodations, including remote local government meeting authorizations, through March 31, 2023. Legislation signed on July 16 allows local governments to continue holding remote and hybrid public meetings through March 31, 2023. Pictured here is a hybrid Franklin Town Council meeting. (Photo courtesy town of Franklin)

Cities and towns again have the option to hold public meetings remotely or in a hybrid format, following the same

Legislature OK’s FY23 state budget

By Jackie Lavender Bird

The House and Senate on July 18 unanimously passed a $52.7 billion state budget bill for fiscal 2023.

Both chambers took quick action on a compromise bill (H. 5050) that was released by a six-member House-Senate conference committee the previous evening.

Gov. Charlie Baker has 10 days to approve the spending appropriations and proposed law changes, veto certain items, or return items with amendments. Lawmakers will then have several days to take up any vetoes before formal sessions end on July 31.

On all key local aid accounts, the compromise bill would provide the higher funding level wherever there were differences in the budget bills passed by the Senate and House, respectively.

In a major win for cities and towns, the Legislature’s budget bill increases Unrestricted General Government Aid by 5.4% ($63 million), a major priority pushed by the MMA throughout budget deliberations. The increase doubles the municipal aid increase originally proposed by the governor in January.

The budget significantly increases Chapter 70 school aid over fiscal 2022, bringing the total to $5.99 billion. There’s also a $67 million increase for the Special Education Circuit Breaker account, an additional $89 million for charter school mitigation payments, and an increase of $10 million for Payments-in-Lieu-of-Taxes for state-owned land.

Following months of state tax collections exceeding expectations, the budget bill reflects an agreement between Senate and House leaders to increase tax collection estimates for fiscal 2023 by $2.66 billion, with $1.9 billion available for the general budget after statutorily required transfers.

The Division of Local Services has posted preliminary Cherry Sheet estimates for each city, town and school district based on the Legislature’s budget.

UGGA

The Legislature’s budget includes $1.23 billion for Unrestricted General Government Aid (line item 1233-2350 and Section 3). UGGA is the state revenue-sharing program that cities and towns receive to fund essential municipal services. With property taxes tightly capped by Proposition 2½, cities and towns rely on state revenue sharing to provide municipal and school services, ensure safe streets and neighborhoods, and maintain vital infrastructure — services that are fundamental to the state’s economic recovery and competitiveness.

Chapter 70

The Legislature’s budget would fund Chapter 70 aid at nearly $6 billion, representing a commitment to fund the Student Opportunity Act according to the original
Executive Director’s Report

SCOTUS complicates the municipal landscape

In three separate rulings on controversial issues, the U.S. Supreme Court ended its recent term by issuing decisions that infringe on municipal discretion and effectiveness in advancing community interests on public safety, climate action and workplace management.

Each of these decisions marked a sharp turn by the court, and raises new concerns about the ability of cities and towns to manage their affairs and have the same impact going forward in the areas of gun violence prevention, carbon emissions reduction, and creation of safe spaces for students with diverse religious perspectives.

In the first decision, New York State Rifle and Pistol Association v. Bruen, the court ruled that states may not require “proper cause” to obtain a license to carry a handgun outside the home. The New York law that was struck down required concealed-carry gun license applicants to demonstrate a special need for self-protection greater than the general population. This is quite similar to the Massachusetts statute that gives local police chiefs — our issuing authority — the ability to require a “good reason” for gun permits. It is widely believed that this Massachusetts standard is the reason why our state has the lowest level of gun violence in the continental U.S. (only Hawaii is lower).

This decision, set by the new 6-3 majority on the court, was based on “historical tradition” throughout “modern Anglo-American history,” looking at five distinct time periods: “medieval to early modern England, the American Colonies and the Early Republic, antebellum America, Reconstruction, and the late-19th and early-20th centuries.” The court decided to eliminate the discretion of police chiefs to decide on firearms license applications with a rearview-mirror standard that ignores the modern context of rising gun violence in a country where guns outnumber the population.

In the second decision, West Virginia v. EPA, the court ruled that the U.S. Environmental Protection Agency lacked the authority to implement its 2015 Clean Power Plan, which required power plants to implement the best system of emissions reduction, designed to compel existing power plants to make technological changes, such as adding scrubbers, to reduce carbon emissions. The goal was to reduce the nation’s percentage of coal-generated electricity from 38% in 2014 to 27% by 2030. Plant operators could shift their generation by making changes in operations, or by investing in solar or wind generation through the cap-and-trade process.

The coal industry chafed at the new regulation and sued. Even though Congress delegated broad authority to the EPA in the Clean Air Act to implement systems and regulatory structures to reduce harm-
House passes $3.8B economic development bill

By Ali DiMatteo

On July 14, the House passed a $3.8 billion economic development bill that is technically an update to the $3.5 billion “FORWARD” bill that Gov. Charlie Baker filed in April.

The House bill (H. 5034) would raise $1.26 billion through bonds, with the remaining $2.5 billion coming equally from the state’s share of American Rescue Plan Act funding and the fiscal 2022 state budget surplus. (The governor’s bill would use all of the state’s remaining $2.3 billion in ARPA funding and $1.2 billion in bonding.)

The House bill includes many of the programmatic priorities of the governor’s bill, including:

- $400 million for MassWorks grants
- $204 million for the Clean Water Trust to support water pollution abatement, PFAS remediation and other issues
- $175 million to support affordable housing production.

The House bill expands on the original with funding for programs such as $15 million to address reproductive and family planning service needs, $15 million to help reduce gun violence, and $25 million to address food insecurity.

The bill would also formally establish the Massachusetts Cybersecurity Center.

The House bill proposes some significant changes to tax law, including increases in the estate tax trigger, the dependent child tax credit, and the senior circuit breaker tax credit. The bill would provide state income tax rebates of up to $250 to more than 2 million Massachusetts residents.

The MMA has strongly advocated for passage of an economic development bill this session, as well as the swift allocation of the state’s ARPA funding, in part to avoid the possibility of the U.S. Congress pulling back any of the state’s remaining $2.3 billion in ARPA allocations if the funds are not yet committed to projects. Federal ARPA rules require funds to be obligated by the end of 2024 and expended by the end of 2026.

The House bill would leave the state with just over $1 billion in ARPA funds.

The Senate is scheduled to take up its own economic development bill very soon, and differences between the two bills may need to be resolved by a House-Senate conference committee. Similar large-scale economic development bills have traditionally been done at the end of a two-year legislative session. The current session is scheduled to end on July 31.

At a June 24 legislative hearing, Brockton Mayor Robert Sullivan joined Newton Mayor and MMA President Ruthanne Fuller and other local officials supporting an economic development bond bill originally filed by Gov. Charlie Baker as the FORWARD Act.

Governor signs voting and election reform bill

By Ali DiMatteo

On June 22, Gov. Charlie Baker signed into law an election reform bill that makes many pandemic-related election changes permanent, expanding some voting opportunities in time for the next statewide election in September.

The new law changes the voter registration deadline from 20 days before an election to 10 days. The final bill (S. 2924) did not include same-day voter registration, a sticking point between the House and Senate in earlier versions of the bills.

The law allows mail-in ballots for presidential, state and municipal elections, while allowing municipalities to opt out of mail-in voting for elections that are not held on the same day as a state or federal election. Municipalities could, however, allow in-person early voting for those elections if they choose.

The law allows mail-in ballots for presidential, state and municipal elections, while allowing municipalities to opt out of mail-in voting for elections that are not held on the same day as a state or federal election. Municipalities could, however, allow in-person early voting for those elections if they choose.

Under a new election reform law signed on June 22 by Gov. Charlie Baker, municipalities may allow in-person early voting.

The law allows mail-in ballots for presidential, state and municipal elections, while allowing municipalities to opt out of mail-in voting for elections that are not held on the same day as a state or federal election. Municipalities could, however, allow in-person early voting for those elections if they choose.

The Senate passed an election reform bill, known as the VOTES Act, in October 2021, and the House passed its version of the VOTES Act in January. A House-Senate conference committee resolved differences between the two bills, and a compromise bill was approved in each branch in mid-June.

2023. These include automatic voter registration, and expanded voting access procedures for incarcerated individuals.

The Senate passed an election reform bill, known as the VOTES Act, in October 2021, and the House passed its version of the VOTES Act in January. A House-Senate conference committee resolved differences between the two bills, and a compromise bill was approved in each branch in mid-June.
Committee considers $5B bond bill with funding for local projects

By Jackie Lavender Bird

A conference committee met for the first time on July 7 to begin the process of resolving differences between $5 billion general government bond bills passed by the House and Senate.

Both five-year bond bills (H. 4807 and S. 2951) include funding for a range of municipal grant programs, including:

- $100 million for municipal grants to support a range of local infrastructure improvements and projects
- $64 million to support the Massachusetts State Revolving Fund, specifically for state matching funds required to secure federal dollars for the fund, which helps cities and towns improve water supply infrastructure and drinking water safety
- $60 million for the Housing Stabilization Fund, which provides funding for municipalities, nonprofits, for-profit developers and local housing authorities in support of affordable rental housing production and rehabilitation
- $50 million for the Cultural Facilities Fund to provide grants for planning, acquisition, rehabilitation and construction of cultural facilities, administered through Massachusetts Cultural Council and MassDevelopment
- $25 million for Housing Choice grants to municipalities that receive a Housing Choice designation

The two chambers took different approaches to investments in municipal information technology. The House bill includes $30 million for the Community Compact IT competitive grant program for innovative technology initiatives at the local level. The Senate bill includes $20 million, with funding for IT grants to municipalities to expand remote meeting accessibility for residents.
EPA releases new health advisories on 4 PFAS chemicals

By Josie Ahlberg

On June 15, the U.S. Environmental Protection Agency released new health advisories for four per- and polyfluoroalkyl substances, or PFAS, replacing prior health advisories from 2016.

The EPA is using its power under the Safe Drinking Water Act to issue health advisories for contaminants not yet subject to National Primary Drinking Water Regulation. Drinking water health advisories provide information on contaminants that can cause health effects and are known or anticipated to occur in drinking water. They are unenforceable and nonregulatory, but help to educate water system administrators and users on contaminants.

The new advisories indicate that some negative health effects may occur with concentrations of certain PFAS in water that are near zero. With nearly no known safe level of exposure to two particular PFAS, water systems could face daunting tasks of widespread testing, remediation and cleanup efforts ahead.

Per- and polyfluoroalkyl substances are a family of chemicals used since the 1940s in a range of packaging materials and consumer products, particularly water-resistant, stain-resistant and non-stick items, as well as fire extinguishing foams. PFAS are water soluble, so over time they leach into groundwater and can contaminate drinking water, rivers, lakes and wildlife. The chemicals do not break down easily — they’re known as “forever chemicals” — and can be difficult and expensive to mitigate.

Studies suggest that human exposure to high levels of PFAS may lead to adverse health outcomes such as reproductive effects, developmental effects in children, increased cancer risk, and interference with the body’s immune and hormonal systems.

The new health advisories apply to the following PFAS:

- PFOA (perfluorooctanoic acid), used to make products non-stick, water resistant and stain resistant
- PFOS (perfluorooctane sulfonic acid), used as a stain repellent, fabric protector, and component of firefighting foam
- PFBS (perfluorobutane sulfonic acid and its potassium salt), considered a replacement for PFOA
- HFPO (hexafluoropropylene oxide) dimer acid and its ammonium salt (also known as “GenX chemicals”), used as a replacement for PFOS

**PFOA and PFOS**

Six years ago, the EPA released health advisories for PFOA and PFOS that set 70 parts per trillion, or ppt, as the maximum contaminant level in drinking water, below which there was believed to be no known or expected risk to health.

In 2020, Massachusetts took a stricter approach and established a 20 ppt state maximum contaminant level for a set of six specific PFAS known as PFAS6, which includes PFOA and PFOS.

The EPA’s new interim advisories indicate that some negative health effects may occur at as little as 0.004 ppt for PFOA and 0.02 ppt for PFOS. These new levels, however, are below levels that existing testing and analytical methods can detect, further complicating the ability of communities to address PFAS appropriately. Improving PFAS detection and precision in testing is one of several key priorities in the EPA’s PFAS strategy.

**PFBS and HFPO**

The EPA’s final health advisories for HFPO/GenX chemicals and PFBS are based on final assessments of their toxicity to animals. Finalizing advisories for these two chemicals was a goal of the PFAS Strategic Roadmap, the agency’s approach to research, restriction and remediation of PFAS over the next several years.

The new health advisory level for HFPO is 10 ppt. For PFBS, the advisory is set at 2,000 ppt. These two chemicals are not included in the Massachusetts PFAS6, so they are not currently subject to a stricter state standard, nor are they frequently included in statewide PFAS testing.

The health advisories on these two chemicals, as well as PFOA and PFOS, serve as a statement of intention for future regulation, as well as a request to water utilities and states to begin addressing PFAS contamination in their water systems if they have not already done so.

**Next steps**

The EPA is moving forward with its regulatory process, with a new PFAS National Drinking Water Regulation proposal expected this fall that is likely to address the four PFAS in the new health advisories in greater detail.

The Bipartisan Infrastructure Law includes $5 billion in grant funding to address known or suspected PFAS contamination over fiscal 2022 through 2026. States and territories must submit a letter of intent for grant funding by Aug. 15. Details are available on the EPA’s emerging contaminants website.

The Massachusetts Department of Environmental Protection’s State Revolving Fund project solicitation period for new drinking water and clean water projects is open through Aug. 12. PFAS mitigation and design projects have been identified as priorities for the 2023 round of funding.

The MassDEP is expected to issue further guidance in response to the EPA’s health advisories soon. Rep. Kate Hogan and Sen. Julian Cyr, co-chairs of the PFAS Interagency Task Force, have indicated that PFAS might be further addressed in a bill next session, with steps for accountability as well as funding for remediation efforts. Meanwhile, Attorney General Maura Healey is suing 13 manufacturers of PFAS, seeking accountability and payment for damages caused by PFAS contamination across the state.

In an effort to protect drinking water, the U.S. Environmental Protection Agency has issued new PFAS-related health advisories.

Gov. signs $200M Ch. 90 bill, with additional $150M

By Adrienne Núñez

On June 17, Gov. Charlie Baker signed a Chapter 90 bond bill for fiscal 2023 that appropriates $200 million for the local road maintenance program and provides an additional $150 million for other municipal grant programs related to roadwork.

In addition to $200 million for the Chapter 90 municipal road and bridge program, $150 million for municipal grant programs was included in the legislation:

- $30 million for the Municipal Small Bridge Program
- $30 million for Complete Streets
- $40 million for design, construction, repair and improvements on non-federally aided roads and bridges, including state routes and municipal roads
- $25 million to improve bus stops and stations
- $25 million for mass transit and commuter rail stations and parking lots, and related enhancements

An associated bill setting the terms of the bond issuance is now before the House Committee on Ways and Means. Approval of the terms bill is necessary for the Massachusetts Department of Transportation to issue reimbursements to municipalities on qualifying fiscal 2023 projects.

Both the terms bill and the Chapter 90 bill include emergency preambles that enable them to take effect immediately upon being signed by the governor.

The Chapter 90 reimbursement program was created in 1973 to provide support to all 351 cities and towns to maintain 30,000 miles of local roads and hundreds of bridges. Apportionments are calculated based on local road miles, employment and population.

The MMA and local officials have long advocated for swift passage of a Chapter 90 bill and an increase to $300 million per year, indexed to inflation. The MMA has also been requesting a multiyear bill to help cities and towns better plan for use of the funds.

The MMA’s recently updated biennial statewide survey shows that cities and towns need $600 million in Chapter 90 funding to adequately fund municipal road and bridge projects. Base funding for the program, however, has been level-funded at $200 million per year since fiscal 2012. The MMA calculates that the program’s purchasing power has decreased by 42.6% over the past 11 years.

Passage of the $100 million winter road recovery program in April, an MMA priority, provided much-needed interim funding to assist cities and towns in addressing road funding needs.

MassDEP opens State Revolving Fund applications for water projects

By Adrienne Núñez

The Massachusetts Department of Environmental Protection is soliciting project proposals for the Clean and Drinking Water State Revolving Fund loan program through Aug. 12 at noon.

The 2023 financing round for drinking water construction projects will prioritize projects that focus on PFAS remediation and lead reduction.

Financing for clean water construction projects will prioritize the following:

- Financing, removal or abatement of combined sewer overflow discharges
- Stormwater planning to help communities comply with MS4 permits
- Projects that include green elements and innovative technologies that reduce energy consumption, conserve resources, produce renewable energy, or enhance climate resiliency

The selection process for clean water projects will use a revised ranking system similar to that used for drinking water projects. The system classifies projects into five tiers that help identify the most significant proposals to improve and protect water quality and public health in the Commonwealth.

Funding is also available for planning and assessment of existing water infrastructure, including cybersecurity, under the Asset Management Planning program.

Project Evaluation Forms for construction projects and asset management planning for the 2023 financing round may be submitted via MassDEP’s PEF portal.

MassDEP is also maintaining an open solicitation for the following projects, which do not require a Project Evaluation Form:

- Planning Projects: Upon publication of the Final 2023 Intended Use Plans, MassDEP will begin accepting loan applications on a rolling basis.
- PFAS Design Projects: Upon publication of the Final 2023 DWSRF IUP, MassDEP will accept, on a rolling basis, loan applications for the design phase of PFAS remediation projects.
- Lead service line planning loans with 100% loan forgiveness: MassDEP is accepting, on a rolling basis while funding is available, loan applications to complete lead service line inventories and replacement programs.

Communities with a Housing Choice designation are eligible for a discount of up to 0.5% on their SRF interest rate from the standard rate of 2%.

Questions about the SRF programs may be sent to MassDEP Municipal Services Division Director Maria Pinaud at Maria.Pinaud@mass.gov.
DOER releases draft building energy code updates

By Josie Ahlberg

The “stretch code” is an above-code appendix to the state’s base building energy code, designed to result in cost-effective construction that is more energy-efficient than what is built under the base code. Since 2010, municipalities have had two options: the base energy code or the stretch energy code. This past spring, through a Building Energy Code Straw Proposal, the DOER offered draft language for a new third option, the specialized municipal opt-in code.

The Climate Act of 2021 and the Green Communities Act of 2008 tasked the DOER with updating and implementing new energy code language by the end of this year.

Updating the stretch energy code is a technical method to help Massachusetts achieve its goal of net-zero emissions by 2050. With 299 cities and towns having adopted the existing stretch energy code and fulfilling other requirements for becoming a Green Community, the updated base, stretch, and specialized opt-in codes are expected to further advance clean and renewable energy practices.

The new code language would update compliance pathways in the base and stretch energy code and introduce more stringent energy efficiency requirements.

The base energy code is being refreshed with the 10th edition of Board of Building Regulations and Standards codes and the 2021 edition International Energy Conservation Code updates. The stretch energy code will similarly be updated with IECC 2021, updated Massachusetts code compliance pathways, and the elimination of some existing base code exceptions to further promote energy efficiency measures.

Specialized opt-in code

The DOER’s draft language would further define the new Specialized Opt-in Code, which would allow cities and towns that wish to adopt stricter local building codes to go beyond the base and stretch code by requiring all new buildings to be designed for electric service and wiring appropriate for future electrification.

With 299 cities and towns having adopted the existing stretch energy code and fulfilling other requirements for becoming a Green Community, the updated base, stretch, and specialized opt-in codes are expected to further advance clean and renewable energy practices.

The specialized code provides a set of net-zero building performance standards that combine highly energy-efficient design, onsite renewable energy generation, and electrification to comply with state emission limits and goals. The specialized opt-in stretch code language includes the following updated definition of a net-zero building: “A building which is consistent with achievement of MA 2050 net-zero emissions, through a combination of highly energy efficient design together with being an all-electric or Zero Energy Building, or, where fossil fuels are utilized, a building fully pre-wired for future electrification and that generates solar power on-site from the available Potential Solar Zone Area.”

The DOER has outlined the process by which cities and towns may pursue adoption of the specialized code. Adoption would require a vote by the city council or town meeting to opt-in, followed by a phase-in period to allow an appropriate transition for developers, designers, builders and code officials to get up to speed with new requirements. The specialized, net-zero requirements would take effect on the next Jan. 1 or July 1, whichever is at least six months after the municipal vote.

An increasing number of cities and towns are actively seeking the authority to prohibit on-site fossil fuel combustion in new construction and major renovations. Adoption of the specialized stretch energy code would be a meaningful move forward in efforts to reduce dependency on fossil fuels.

As the summary of the draft regulations acknowledges, “buildings reliant on fossil fuel combustion equipment have no clear path to zero emissions.” The updates to the base energy code, stretch energy code, and new specialized code target municipal priorities: emissions reduction within the buildings sector and increased energy efficiency across municipal, residential and commercial properties.

In March, the MMA submitted a letter during the Building Energy Code Straw Proposal public comment period highlighting areas of municipal concern regarding the proposal and its goals to address climate change through the energy code. The letter requested more details on the opt-in stretch energy code, including a strong definition of net-zero, as the straw proposal’s definition did not make reference to specific features of net-zero building performance that might be considered.

Next steps

The DOER has opened its public comment period on the new draft code language. Written comments can be submitted to stretchcode@mass.gov with the subject line “Building Code Comments” through 5 p.m. on Aug. 12.

Three public hearings are planned for July and August. An introductory webinar was held on July 7 that provided an overview of the updates and answered initial questions. Representatives from DOER gave context to the technical requirements of the new and updated energy efficiency pathways municipalities can follow to comply with the code language.

More information on the draft code language and upcoming events can be found on the Stretch Energy Code Development 2022 website.
**MSA to hold training for newly elected select board**

The Massachusetts Select Board Association will hold a free training for newly elected select board members on Saturday, July 23, in Devens.

The meeting will open with a roundtable discussion with members of the MSA Board of Directors: “You’ve been elected, now what?” Veteran select board members will share their experiences during this informal session and take questions.

Additional sessions will cover:
- Municipal Finance and Budgeting 101, with Westwood Finance Director Pamela Dukeman
- Introduction to the Open Meeting and Public Records Laws, with attorney Karis North from Murphy, Hesse, Toomey & Lehane
- Collaborative Decision Making, with former Arlington Town Manager Adam Chapdelaine

The training will be targeted to newly elected members, but any select board member is welcome to attend for a refresher and an opportunity to network with colleagues.

Registration and networking will begin at 8:30 a.m. The program will start at 9 a.m., and lunch will be served. The full agenda and registration is available at www.mma.org.

The training will be held at Devens

---

**DLS publishes issue dedicated to new local officials**

The June 16 edition of the Division of Local Services’ e-newsletter, City & Town, is dedicated to newly elected or appointed local officials, with municipal finance resources, information and policy guidance for those who might be new to local government.

Articles include a welcome to local government by Sean Cronin, senior deputy commissioner at the Division of Local Services; highlights of the DLS’s New Officials Youtube Playlist; recommended policy resources for new officials; and helpful data for new officials.

There are also links to introductory municipal finance guidance, trainings, data and other helpful resources.

---

**Rivera, mayors discuss development resources**

MassDevelopment President and CEO Dan Rivera speaks to mayors about resources available to cities during the July 20 meeting of the Massachusetts Mayors’ Association in Revere. Before taking the lead of MassDevelopment in January 2021, Rivera had served as mayor of Lawrence for seven years.

---

**Municipal Finance Training and Resource Center** features an array of trainings and municipal finance tools, and the DLS Youtube channel has a wealth of content related to municipal finance.

Over the past several years, the DLS has retooled its approach to training and professional development by building an online resource center that is available at all times.

The newsletter encourages new local officials to sign up for DLS email alerts and confirm that their contact information is accurate in the DLS Local Officials Directory.

– John Ouellette
Secretary Card releases Clean Energy and Climate Plan

Energy and Environmental Affairs Secretary Beth Card today released the state’s “Clean Energy and Climate Plan for 2025 and 2030,” which establishes an economy-wide emissions limit representing a 33% reduction from 1990 levels in 2025, and a 50% reduction in 2030.

The 2025/2030 CECP represents the Commonwealth’s comprehensive plans to achieve aggressive emissions reduction in 2025 and 2030. According to the Executive Office of Energy and Environmental Affairs, the plan “is rooted in the understanding that climate change poses a unique and potentially irreversible threat to the well-being of society.”

The plans for 2025 and 2030 “maximize the ability to realize a 2050 future in which the heat in homes, power in vehicles, and electric grid can all operate with a minimum reliance on fossil fuels, and natural and working lands can be protected from conversion and better managed and restored to enhance carbon sequestration.”

The 2025/2030 CECP “exhibits the confidence that Massachusetts can help lead the clean energy transition and that doing so will mean more well-paying jobs, improved public health, reduced consumer costs, and better quality of life for all residents.” Economic analysis performed during the plan’s development estimates that the 2025/2030 CECP will result in a net gain of more than 22,000 jobs by 2030, with 95% of those clean energy jobs paying wages of more than $26 per hour.

Secretary Card wrote that the plan “prioritizes actions within several sectors of the economy to close the gap between current emissions and future emissions targets. These initiatives include the implementation of the California vehicle emissions standards to advance the electrification of cars and trucks; increasing electric vehicle charging infrastructure while expanding investments in the public transportation system; pursuing recommendations from the Commission on Clean Heat to transform how homes and businesses are heated; doubling the state’s efforts to conserve natural and working lands; and significantly expanding tree planting, especially in environmental justice neighborhoods.”

Chapter 8 of the Acts of 2021, An Act Creating a Next-Generation Roadmap for Massachusetts Climate Policy, requires the secretary of Energy and Environmental Affairs to set interim emissions limits and sector-specific sub-limits every five years. The law set July 1, 2022, as the deadline for the adoption of the 2025 and 2030 emissions limits and sublimits, as well as the release of a comprehensive plan to achieve those limits.

Visit the Clean Energy and Climate Plan website for more information.

MSA discusses practical needs for remote meetings

By Isabelle Jenkins

A free Massachusetts Select Board Association webinar on June 15 discussed the technology and staffing resources required for municipalities to run successful virtual and hybrid meetings.

Virtual and hybrid public meetings have allowed municipalities to continue operations during the pandemic, and have the added benefit of improving equity in access, public engagement and transparency in government operations. But these meetings require both the right technology and the right staffing to ensure an orderly meeting with limited interruptions.

Franklin TV Executive Director Peter Fasciano gave an overview of the technology that his town uses to run virtual and hybrid meetings. He discussed the audio and video systems used for the local access television station to make meetings available to the public, and the protocols in place for both Franklin TV and town staff to ensure successful meetings.

Cohasset Planning and Zoning Director Lauren Lind gave an overview of staff responsibilities during virtual meetings, and discussed their advantages and disadvantages. She outlined best practices for virtual meetings, and discussed steps her town is taking to prepare for hybrid meetings in the future.

During a June 15 webinar, members of the Massachusetts Select Board Association discuss the technology and staffing resources required for municipalities to run successful virtual and hybrid meetings. Pictured are (clockwise from top left) Cohasset Planning and Zoning Director Lauren Lind, Westwood Select Board member Michael Walsh, and Franklin TV Executive Director Peter Fasciano.
Mayors discuss mental health and policing

By Amanda Brangwynne

On June 22, mayors from across the state gathered in Amesbury to hear from experts on addressing the challenges surrounding mental health and policing and the resources available to their communities.

Pittsfield Police Chief Michael Wynn, a member of the Peace Officer and Standards Training Commission, gave an overview of the issue from a municipal and public safety perspective and shared examples of co-response crisis intervention teams. He emphasized the importance of not only improving police response during mental health crises, but also the pressing need to address the mental health of first responders.

John Barber, forensic director for the Department of Mental Health Services Western Area, and Sarah Abbott, founder and principal of Abbott Solutions for Justice, highlighted the array of grant opportunities available to municipalities. These included the Jail Diversion Programs, which encourages the use of de-escalation and less force during interactions between first responders and people in crisis and has shown to decrease arrests and unnecessary visits to the emergency room. JDP funding began in 2007 and now has $9 million available, with more than 100 grants impacting 175 municipalities.

The meeting concluded with a presentation by the Amesbury School Support and Empowerment Team (ASSET), which brings together stakeholders from Amesbury Public Schools, Amesbury Police, Amesbury Fire, the mayor’s office, and the Pettengill House to enhance communication between to better respond to and support Amesbury Public School families and students.

Administration awards $13M through Municipal Fiber grant program

On June 2 in Taunton, Lt. Gov. Karyn Polito announced $13 million in grants through the Community Compact Cabinet’s Municipal Fiber grant program.

The grants will help 86 municipalities and school districts with the construction or completion of their municipal fiber networks to enable more efficient management of IT infrastructure and aggregate internet bandwidth purchases and associated security infrastructure.

The administration established the Municipal Fiber grant program in its fiscal 2022 Capital Investment Plan, which allocated $3 million to the program, and added $10 million from surplus fiscal 2022 capital reserves to help meet the demand for the new competitive grants. Grant recipients are required to contribute a 5% local match.

The administration said the grants will help recipients take an enterprise approach to network monitoring and cybersecurity.

For example, Taunton will receive $190,000 to extend the city’s existing fiber network, which will help protect the Taunton water distribution network against cyber and environmental threats.

Rockport, Gloucester and Essex will receive $459,672 to complete connections between them for regionalization of shared services, backup of public safety functions, and cost reductions in numerous redundancies that currently exist across the region.

Amherst will receive $295,925 to extend its existing municipal fiber network to provide connectivity for Amherst’s and Pelham’s municipal facilities and other assets.

See the full list of awardees and projects.

Managers explore happiness, resilience at work

Needham Town Manager Kate Fitzpatrick explains how her fellow managers can be happier at work during the Massachusetts Municipal Management Association spring conference, which was held in Gloucester on June 2 and 3. Fitzpatrick led a discussion on how to practice resilience, and how it can bring more happiness to one’s work and home life. She called on several colleagues to share their techniques, which ranged from learning a new hobby, such as beekeeping, to tackling difficult subjects, such as personal financial planning and budgeting.
of a thoughtfully chosen and thoroughly prepared selection committee or panel for the interview process. Dunham, Kleckner and Hamilton all recommended including a select board member on the panel for certain jobs; establishing and discussing interview questions in advance; and considering the diversity of the panel.

"We are always looking for diverse candidates, and it’s important that your panel reflects that,” Kleckner said.

When pursuing a new opportunity, Molly Kean, then the human resources director in Norwood and now the assistant town administrator/HR director in Westwood, suggested reaching out to colleagues who have recently hired someone for the type of position you are interviewing for, to get a sense of the types of questions that will be asked. Then, prepare answers to questions, and practice the responses. She also recommends asking in advance who will be on the interview panel.

Rowley Town Administrator Deborah Eagan discussed the importance of having a strong application package, backed by a strong interview. With applications or during an interview, she recommends submitting work products that display necessary skills and achievements. Eagan said a basic understanding of municipal law is a huge value for a candidate.

The meeting kicked off with a discussion of the book "Huddle: How Women Unlock Their Collective Power" by Brooke Baldwin, which includes strategies for formulating groups for professional and personal support. The discussion was led by Needham Town Manager Kate Fitzpatrick and Southborough Assistant Town Manager Vanessa Hale.

The mission of Women Leading Government is to encourage and support women in appointed staff positions in local government.

Westford Town Manager Jodi Ross, Stow Assistant Town Administrator Dolores Hamilton, Brookline Town Administrator Mel Kleckner, Norwood Human Resources Director Molly Kean, Sandwich Town Manager Bud Dunham and Rowley Town Administrator Deborah Eagan speak on a panel during the June 23 meeting of Women Leading Government.

Women municipal leaders discuss interview process

By Meredith Gabrilska

On June 23 in North Reading, Women Leading Government, an initiative of the Massachusetts Municipal Management Association, discussed strategies for “owning” the interview process in local government, both as interviewers and interviewees.

A panel of six local government professionals discussed their career trajectories, interview practices they’ve established in their communities, and interviewing advice.

Westford Town Manager Jodi Ross, who recently announced her upcoming retirement, discussed the path of her career, which coincided at times with raising a family and getting a master’s degree in public administration. She endorsed promoting from within whenever possible. She also shared that, when she has encouraged women to apply for promotions, they often express uncertainty about being qualified, but when they participate in interviewing applicants for that position, they often realize they are in fact well-qualified.

“If you want to move up … every day show up and ask what is not working and what you can do to help with that,” Ross said. “Be part of the solution.”

Ross recommended being open with supervisors about career ambitions, so they can help you get there and to find a city or town that is a good fit.

Sandwich Town Manager Bud Dunham said his team always considers three things when a position opens up: examining and improving the job description; seeking open-minded, big-picture thinkers at all levels in the organization; and actively considering how a person would relate to coworkers outside of their team within the small town. For example, he said, during the pandemic it was invaluable that the public health nurse knew the police chief by name.

Dunham recognized that municipalities are struggling to fill high-level finance positions, an issue Sandwich faced recently when their finance director/treasurer/collector decided to relocate to Florida.

“It is so hard to find that three-headed unicorn, so we decided to retain them as finance director and they will work remotely from Florida — to try and think outside the box,” Dunham said. “We will only need to find a treasurer/collector.”

Brookline Town Administrator Mel Kleckner, who has announced his retirement at the end of this summer, described his career trajectory as “the most traditional there is.”

“One thing we all have in common is we want to help people,” Kleckner said. “We are working in local government and the public sector for a reason.”

He discussed using screening committees for interviews, and said it’s important for job candidates to know in advance who will be on their panel and for them to do some research about the town.

Kleckner noted the challenges municipalities are facing with recruitment and hiring, noting that employees are moving from one community to another, and managers are looking for possible recruits from other communities.

“We are looking for different ways to hire people,” he said. “It used to be that applications would just pile in. We have to be more proactive about recruiting.”

Stow Assistant Town Administrator Dolores Hamilton stressed the importance of providing in-service training on interviewing practices in order to prepare a panel for what they can or cannot ask, with a focus on competency-based and situational questions. She suggested redacting identifying characteristics from applications — even the candidate’s hometown — to avoid any bias and to encourage diversity.

A common thread was the importance of a thoughtfully chosen and thoroughly prepared selection committee or panel for the interview process. Dunham, Kleckner and Hamilton all recommended including a select board member on the panel for certain jobs; establishing and discussing interview questions in advance; and considering the diversity of the panel.

“We are always looking for diverse candidates, and it’s important that your panel reflects that,” Kleckner said.

When pursuing a new opportunity, Molly Kean, then the human resources director in Norwood and now the assistant town administrator/HR director in Westwood, suggested reaching out to colleagues who have recently hired someone for the type of position you are interviewing for, to get a sense of the types of questions that will be asked. Then, prepare answers to questions, and practice the responses. She also recommends asking in advance who will be on the interview panel.

Rowley Town Administrator Deborah Eagan discussed the importance of having a strong application package, backed by a strong interview. With applications or during an interview, she recommends submitting work products that display necessary skills and achievements. Eagan said a basic understanding of municipal law is a huge value for a candidate.

The meeting kicked off with a discussion of the book "Huddle: How Women Unlock Their Collective Power" by Brooke Baldwin, which includes strategies for formulating groups for professional and personal support. The discussion was led by Needham Town Manager Kate Fitzpatrick and Southborough Assistant Town Manager Vanessa Hale.

The mission of Women Leading Government is to encourage and support women in appointed staff positions in local government.
MassDOT launches long-range planning project

By Adrienne Núñez

The Massachusetts Department of Transportation is paving the way into the future with a long-range planning effort called Beyond Mobility: The Massachusetts 2050 Transportation Plan.

Beyond Mobility will develop a guide for transportation decision-making and investments for the next 27 years using an extensive, four-stage process:

1. Assessment: through fall 2022
2. Visioning: through summer 2022
3. Evaluation: summer 2022 through spring 2023
4. Recommendations: spring through fall 2023

A final, comprehensive plan is due to be released in the fall of 2023.

The process will include:
- Analysis of existing conditions
- Public engagement
- A statewide vision for transportation
- Scenario planning
- Site-specific needs assessments
- Financial planning
- Recommendations

Beyond Mobility seeks to advance MassDOT's goals and maximize equity and the resiliency of the state's transportation system. The process will include extensive public input. The planning team is now seeking to capture the public's vision and values for transportation in the Commonwealth, as well as transportation-related needs and barriers experienced by residents.

Public input on these topics is being accepted through July 31 via the Beyond Mobility visioning survey or emails to the planning team at BeyondMobility@dot.state.ma.us.

An email update service is available.

Federal program offers bridge repair and replacement grants

By Adrienne Núñez

The Federal Highway Administration is now accepting applications for the Bridge Investment Program to support bridge replacement, rehabilitation, preservation and protection.

The program offers grants in three categories:
- Planning
- Bridge projects with eligible costs up to $100 million
- Large bridge projects with eligible costs exceeding $100 million

A total of $20 million is available for planning grants, and $2.36 billion will be distributed through Bridge and Large Bridge project grants in this year’s cycle. Large Bridge projects are eligible for multiyear grants.

Cities and towns, as well as state and tribal governments, MPOs with populations over 200,000, and special purpose districts are eligible to apply for funding.

Applications can be submitted through Grants.gov by the following deadlines:
- Planning: July 25
- Bridge Project: Sept. 8
- Large Bridge Project: Aug. 9

Eligible projects must:
- Improve the safety, efficiency and reliability of the movement of people and freight over bridges
- Improve the condition of bridges by reducing the number of bridges, and total person miles traveled over bridges, that are in poor condition or fair condition and at risk of falling into poor condition within the next three years; or the number of bridges, and total person miles traveled over bridges, that do not meet current geometric design standards or cannot meet the load and traffic requirements typical of the regional transportation network

Applications must address how the bridge will be maintained and what accommodations will be made for bicyclists and pedestrians. The selection process will also consider the use of non-federal contributions from sponsors and stakeholders involved in the planning, design and construction of eligible projects to support Bridge Investment Program projects.

For more information, contact Angela Jones or Robin Hobbs in the Federal Highway Administration’s Office of Acquisition and Grants Management at BridgeInvestmentProgram@dot.gov.
Railroad Crossing Elimination Program offers grants

By Adrienne Núñez

The Federal Railroad Administration is accepting applications through Oct. 4 for a new Railroad Crossing Elimination Grant Program.

The discretionary grant program, funded by the Bipartisan Infrastructure Law, will provide $3 billion over five years to improve safety and wait times at railroad crossings while ensuring efficient and affordable movement of freight.

More than $573 million is available this year, with at least 20% of funding to be awarded to rural and tribal areas. Individual grants will be at least $1 million, except for planning projects, with no predetermined maximum. No more than 20% of total grant funds will be awarded per state.

Cities and towns are eligible to apply, as well as states, local and tribal governments, metropolitan planning organizations, public port authorities, and collaborations of these entities.

Eligible projects include:
- Grade separations or closures
- Track relocation
- Improvement to or installation of protective devices, signals, signs, or other safety related measures
- Other safety improvements related to the mobility of people and goods at highway-rail or pathway-rail grade crossings
- Planning, environmental review, and design of eligible projects

Project proposals will be evaluated based on their potential to improve safety by eliminating crossings or improving resiliency, and ensure that every place has a chance to thrive.

The DOT Navigator is a new one-stop shop to access the array of resources across the department that are designed to provide technical assistance and help grantees navigate the grant application, transportation planning, project delivery, funding and financing, and implementation processes. Available now in a beta version, the DOT Navigator includes a set of fact sheets and information to help those new to federal grant programs understand key requirements, gain tips for successful applications, and better navigate commonly required processes and terminology.

Over the coming months, the site will continue to be built out to improve the user interface, enable search functions, and provide additional helpful resources. The DOT Navigator does not provide technical assistance, but makes it easier to find available resources and contacts.

The Thriving Communities Program, set to launch this fall, will provide technical assistance and capacity building to enable under-resourced communities to identify, develop and deliver transformative transportation projects. This includes community planning and project development of infrastructure projects that increase affordable transportation options, enhance economic opportunity, reduce environmental burdens, improve access and quality of life, and provide other benefits to underserved communities.

The DOT is partnering with the Department of Housing and Urban Development, which will provide complementary technical assistance to improve the coordination of housing and transportation planning to advance residents’ access to opportunity and increase housing supply.

Program notices of funding opportunity to solicit capacity builders will be published later this fall by each agency.

These efforts are intended to create a pipeline of diverse and transformative community-driven infrastructure projects across the country designed to drive inclusive economic growth, build resiliency, and ensure that every place has a chance to thrive.
U.S. DOT offers Reconnecting Communities grants

By Adrienne Núñez

The U.S. Department of Transportation’s new Reconnecting Communities Pilot Program is accepting applications through Oct. 13.

Funded through the Bipartisan Infrastructure Law, the pilot is aimed at connecting communities that have been cut off from economic opportunities due to previous transportation infrastructure projects. Grants are available to support the planning and capital construction of projects that restore community connectivity through the removal, retrofit, mitigation or replacement of eligible transportation infrastructure facilities.

State, local and tribal governments, metropolitan planning organizations, nonprofits and other transportation facility owners are eligible to apply. The program will distribute $1 billion over the course of five years, with $195 million to be awarded this year.

This year, $50 million will be awarded for planning grants. Such grants may be used to study the feasibility and impacts of potential projects as well as to fulfill design needs for potential projects. Examples of eligible planning activities include, but are not limited to, the following:

- Traffic pattern studies
- Transportation network capacity
- Alternative roadway designs
- Mobility impact assessments
- Safety assessments
- Economic and environmental impact assessments
- Public engagement activities

This year, $145 million is available for capital construction grants. Eligible projects include:

- Removal, retrofitting or mitigation of an existing eligible facility
- Replacement of an eligible facility with a new facility that reconnects previously fragmented communities and is sensitive to the context of the surrounding community

Technical assistance will be made available to economically disadvantaged communities for applicants and grant recipients to build organizational or community capacity to engage in transportation planning and identify solutions to infrastructure challenges. The Department of Transportation plans to focus technical support on underserved, overburdened and disadvantaged community recipients that demonstrate need.

The Department of Transportation has scheduled an informational webinar on July 14 from noon to 1:30 p.m.

For more information, email ReconnectingCommunities@dot.gov or contact Faith Hall at 202-366-9055.

Diesel Emissions Reduction Act program accepting grant applications

By Adrienne Núñez

The Diesel Emissions Reduction Act program is offering $1.88 million in grants to support replacement of eligible diesel vehicles and equipment with zero-emission technologies.

Applications are being accepted online through Aug. 24.

The program, administered by the Massachusetts Department of Environmental Protection, allocates federal DERA funding to Massachusetts recipients.

Cities, towns and other private, public and nonprofit entities with an eligible vehicle, engine or equipment that is operated within Massachusetts at least half the time are eligible to apply.

Eligible diesel powered vehicles and equipment include, but are not limited to, the following:

- School buses of type A, B, C and D
- Class 5+ medium-duty and heavy-duty transit buses
- Class 5-8 medium-duty and heavy-duty transit buses
- Category 1, 2, and 3 marine engines and vessels
- Line-haul, passenger and switch engines and locomotives
- Nonroad engines, equipment and vehicles used in construction, handling of cargo, agriculture, mining, or energy production, and transport refrigeration units

Applicants must provide contact information, describe the proposed project, identify existing and desired replacement equipment, and upload supporting documents through the online application portal.

The MassDEP seeks to prioritize Environmental Justice communities and includes criteria and evaluation parameters that emphasize equity, diversity and environmental justice in the grant selection process.

Approved projects must be completed by Sept. 30, 2023.

Detailed grant application guidance and requirements are available online. Questions may be sent to cayla.paulding@mass.gov.
Online maps illustrate progress of gas leak repairs

Massachusetts has one of the oldest natural gas systems in the country, with about 22% of the pipes under the ground considered “leakprone” in 2020, according to HEET, a Cambridge-based non-profit dedicated to cutting emissions.

In 2014, Massachusetts created the Gas System Enhancement Program to hold the six investor-owned natural gas distribution companies responsible for reducing gas leaks by accelerating the replacement of leaking infrastructure by 2039. The program and other statutes require gas distribution companies to ensure that leak-prone iron and steel pipes and services are replaced.

Now, the public can view the location and estimated cost of each new planned gas pipe replacement project using pipe replacement maps created by HEET. Also available is HEET’s annually updated map of gas leaks across Massachusetts, along with estimated emissions.

Last year, 11,624 new gas leaks across Massachusetts emitted nearly 7,000 metric tons of methane — equal to an estimated 600,000 metric tons of carbon dioxide, or $7 million in wasted dollars, according to HEET.

The state’s new Massachusetts Clean Energy and Climate Plan for 2025 and 2030 recognizes that long-term climate policies will affect the future of greenhouse gas emissions, and measures to reduce natural gas combustion for heating buildings and water would reduce methane emissions. Even “targeted decommissioning” of gas distribution systems may be needed to help the state transition to greater electrification.

The Gas System Enhancement Program is scheduled for review in 2024 under the Clean Energy Climate Plan. Among other issues, the process will evaluate safe alternatives to full line replacements in areas with low anticipated natural gas use.

MIIA webinar covers basics of municipal risk management

More than 100 municipal leaders participated in a MIIA webinar on June 27 covering how to identify, monitor and address risks in municipalities.

The hour-long session, “Municipal Risk Management 101,” explained how the risk management process can help local leaders prioritize their response to multiple areas of exposure; how their insurer, agent or advisor can assist them; the current state of the municipal loss picture in Massachusetts; and training and tools to prevent or mitigate future losses.

Attorney Regina Ryan, founder and president of Discrimination and Harassment Solutions, offered sample policies and best practices on a number of issues, including harassment and discrimination, code of conduct for employees and elected, appointed and volunteer officials, computer use, motor vehicle use, and pregnancy and pregnancy-related conditions.

MIIA Risk Management Representative Maureen Montanus shared an analytical process to identify risk, quantify implications, and develop mitigation strategies. She said the process has four basic steps: identification, assessment, control and implement, and response monitoring.

Other speakers included MIIA Loss Control Manager David Dowd and MIIA Senior Manager of Risk Management Lin Chabra, who moderated.

– Joyce McMahon

Attorney Regina Ryan discusses sample policies and best practices during a Municipal Risk Management 101 webinar on June 27.
MMHR to hold Fall Conference on Sept. 14 and 15 in Hull

Massachusetts Municipal Human Resources will host its annual Fall Conference on Sept. 14 and 15 in Hull. Conference sessions will cover topics such as diversity, equity, inclusion and belonging; mental health impacts of the pandemic; and trends in collective bargaining.

Registration and networking will begin at 8:30 a.m. on Sept. 14. The program will start at 9:15 a.m. and conclude at 4:30 p.m. Attendees are invited to join an outdoor cocktail reception immediately following the first day of the conference for beverages, snacks and networking.

Breakfast and networking will begin at 8 a.m. on Sept. 15. The program will start at 9 a.m., and the conference will conclude at noon.

The registration fee is $185 for the full conference or $110 for Wednesday-only. Registration and information about hotel accommodations will be available at www.mma.org in late July.

The conference will be held at the Nantasket Beach Resort at 45 Hull Shore Drive in Hull. Hotel rooms will be available for a nightly rate of $211.36, including taxes and fees.

The MMA currently requires attendees of in-person events to show proof of being fully vaccinated for COVID (card, photo or QR code). (Religious or medical vaccine exemptions are allowed with a negative PCR test taken within 72 hours.) Masks are optional. These safety protocols are subject to change based on the latest public health data and guidance.

Human Services Council discusses post-pandemic food insecurity

By Isabelle Jenkins

The MMA Human Services Council’s Annual Meeting on June 22 in Lexington focused on food insecurity in Massachusetts.

Keynote speaker Catalina López-Ospina, vice president of engagement for Project Bread, discussed a significant increase in food insecurity over the course of the COVID pandemic, which has only worsened in recent months due to inflation. She said food insecurity is most significantly impacting families of color with children.

López-Ospina discussed Project Bread’s work to combat food insecurity in the Commonwealth, including a hotline that connects families in need with services, assistance with Supplemental Nutrition Assistance Program eligibility and applications in more than 180 languages, legislative advocacy, and public awareness campaigns to reduce misinformation and stigma surrounding public benefits.

Following the keynote, a panel discussed public policy and legislation surrounding food insecurity, and local initiatives to address the issue.

Pat Baker, senior policy analyst with the Massachusetts Law Reform Institute, discussed maximizing SNAP benefits during the pandemic, as well as trends and changes in SNAP benefits over the course of the pandemic. She provided information about how local human services providers can help members of the community to confirm countable income and maximize allowable deductions in order to ensure they are receiving all of the benefits available to them through the SNAP program.

Jill Tsakiris, program manager at Open Table in Maynard, discussed food insecurity trends, highlighting that one in three families in Massachusetts has faced food insecurity. Tsakiris gave an overview of Open Table programs, including a drive-through food pantry that allows for meal choice, partnerships with community organizations to provide culturally appropriate foods to immigrant and refugee families, and a Healthy Helpings meal program that provides meals that are safe for individuals with health issues such as heart disease through councils on aging and local housing authorities.

The meeting concluded with a presentation from Rep. Danillo Sena of Acton, who discussed some of his legislative priorities to address pressing social needs post-pandemic, including food insecurity, housing, and behavioral health.

State releases age-friendly progress report

By Jennifer Kavanaugh

In its mission to improve the quality of life for all residents, the state has released its third annual progress report on efforts to make Massachusetts more age- and dementia-friendly.

The 68-page report, “ReiMAgine Aging: Planning Together to Create an Age-Friendly Future for Massachusetts,” was released in early June by the Executive Office of Elder Affairs. It reviews the work done by communities and organizations in making the “places we live, work, and play better places to grow up and grow old,” and tracks the state’s progress in achieving the goals of ReiMAgine Aging, the state’s multiyear, age- and dementia-friendly action plan.

The age-friendly movement seeks to make communities more welcoming and livable for older residents and for people of all ages. Massachusetts joined the AARP Network of Age-Friendly States and Communities in 2018.

The report notes the challenges officials confronted in advancing their efforts in the face of pandemic challenges and the increasing urgency to address racial injustice. In the report’s introduction, Gov. Charlie Baker said the people involved in the movement “made the unbearable bearable,” through collaboration and adjusting their efforts over the past couple of years.

“On so many issues, including the age- and dementia-friendly movement, the people of Massachusetts have led the way,” Baker states. “We continued to see people coming together — older adults, caregivers, community leaders, and organizations — creating a path for a better today and a brighter future.”

Specifically, the report reviews the state’s performance in 2021 over six areas of age- and dementia-friendly work:

- Community: Deepening and strengthening age- and dementia-friendly efforts to be inclusive of all communities and populations
- Information and communication: Providing information in an accessible and user-friendly manner to residents, organizations and municipalities
- Framing: Changing the conversation about aging from a “challenge” to an “asset,” increasing literacy about aging issues, and eliminating ageist images and language across social, print and other media
- Policy and practice: Encouraging the adoption of age-friendly policies and practices in all sectors
- Economic security: Improving economic security of older adults and caregivers
- Sustainability: Creating a sustainable infrastructure to guide and support the work of Age-Friendly Massachusetts and partner initiatives

According to the report, 21 communities joined the age-friendly movement in 2021, including cities such as Framingham and Greenfield, and smaller communities such as Leyden, New Salem, Warwick and Wendell.

The report includes insights from residents and local officials from around the state, including Madeline Noonan, Barnstable’s director of community services.

“In Barnstable, we believe that age-friendly communities are great places to grow up and grow old and that implementing age-friendly practices is an investment in the future health, vitality, and sustainability of the town,” Noonan states in the report. “This process will ensure that every community member has the opportunity to thrive, regardless of age or ability.”

Feedback about the report and the age-friendly effort is welcome, by emailing Aging.Conversation@mass.gov.

MMA, Suffolk welcome 2022 Municipal Fellows

The MMA and Suffolk University are welcoming the second class of MMA-Suffolk Municipal Fellows.

The program, a partnership of the MMA and Suffolk that launched last year, offers significant financial support to municipal professionals to attend the master’s in public administration program at Suffolk’s Sawyer School of Business.

The 2022-2023 MMA-Suffolk Municipal Fellows are:

- William Adamczyk, library director, Milton
- Susan Lumping, assistant human resources director/payroll administrator, Mashpee

The fellows are both graduates of the MMA-Suffolk Certificate in Local Government Leadership and Management program, and were accepted into Suffolk’s MPA program. Each recipient received the support of the chief municipal official in their respective municipality to continue working while attending the program part-time.

The fellowship was highly competitive, and the MMA and Suffolk congratulate the recipients.

Visit mma.org for the latest information about the three MMA-Suffolk programs:

- Certificate in Local Government Leadership and Management
- Municipal Finance Management Seminar
- Municipal Fellowship program
Send us your Municipal Innovation Award entries!

- Has your community been working on a new and unique project?
- Do you have a solution to an issue faced by many municipalities?
- Has your community found a way to improve efficiency in providing municipal services?

If so, your community should enter the MMA’s Innovation Award contest!

The Kenneth E. Pickard Municipal Innovation Award is sponsored each year by the MMA to recognize municipalities that have developed unique and creative projects or programs to increase the effectiveness of local government. It is named in honor of Kenneth E. Pickard, executive secretary of the Massachusetts League of Cities and Towns from 1969 to 1973. Any city or town that is a member of the MMA is eligible to apply. The awards will be presented at the MMA’s Annual Meeting & Trade Show in January 2023.

Entries are due by Monday, Oct. 31.

HOW TO ENTER
- Fill out the summary sheet found on the MMA website (at www.mma.org/mma-annual-meeting/awards), including a description of the project, the groups and individuals involved, goals, strategy, results and funding structure.
- Have your community’s chief municipal official sign the nomination form (found at www.mma.org/mma-annual-meeting/awards).
- Include any additional materials that would assist the judges in understanding the project or program. Feel free to send photos, brochures, maps, newspaper articles, videos, etc.

Entries MUST include a summary sheet and signed nomination form and must be submitted by email.

JUDGING
Entries are judged by the following criteria:
- Project originality or novelty
- Adaptability to other communities
- Cost-effectiveness
- Efficiency or productivity
- Improvement of a municipal service / administration / performance
- Consumer / community satisfaction

Please send one electronic copy to dyi@mma.org.

For more information, please contact
Daniel Yi at the MMA: 617-426-7272, ext. 125, or dyi@mma.org.

Management Association awards Whitlock Scholarship

The Massachusetts Municipal Management Association has awarded the 2022 Gerry Whitlock Memorial Scholarship to Norwood Human Resources Generalist Kelli Spencer.

The MMA awards the $2,000 Whitlock Scholarship each year in July to a Massachusetts graduate student — usually pursuing a master’s degree in public administration — who plans on a career in local government. It’s named for the late Gerry Whitlock, a former town administrator from western Massachusetts.

Spencer is a graduate of the MMA-Suffolk Certificate in Local Government Leadership and Management program, and has since enrolled in Suffolk’s MPA program, with an expected graduation next spring. She plans to continue her career in human resources.

Contact: MMA Senior Member Services Coordinator Denise Baker at dbaker@mma.org
MMA gearing up for annual Trade Show

The MMA is opening its exhibitor registration on Aug. 15 for the Trade Show at the 2023 MMA Annual Meeting, to be held at the Hynes Convention Center in Boston on Jan. 20 and 21.

As of Aug. 15, companies, nonprofits and government agencies looking to exhibit may visit the MMA website to access the 2023 contract for exhibit space, a current exhibit hall floor plan, and an updated list of 2023 exhibitors. As contracts are received, the MMA will add exhibitor names to the 2023 exhibitor list (with a link to their website) and add them to the exhibit hall floor plan.

Sponsorship opportunities will also be available, with more information available in the coming weeks.

For more information, contact Advertising and Trade Show Manager Karen LaPointe at klapointe@mma.org or 800-882-1498, ext. 154.

For more information about the MMA Annual Meeting & Trade Show, visit www.mma.org/annual-meeting. Information about the 2023 event will begin to appear in September.

– Karen LaPointe

Entries sought for municipal website contest

The MMA is now accepting nominations for its annual municipal website awards, which will be presented during the MMA Annual Meeting in January 2023.

The awards recognize excellence in customer service, functionality, convenience and government transparency delivered by a municipal website.

To enter the contest, chief municipal officials may simply fill out a short online nomination form. The entry deadline is Monday, Oct. 31.

The awards recognize the best municipal websites in four population categories: under 5,000; 5,001-12,000; 12,001-25,000; and 25,000-plus. One winner is selected for each category.

Judges evaluate municipal websites based on the following criteria:

- Current and timely information
- Intuitive navigation tools and organization of material
- Ease of access to resources for residents, such as the ability to apply for licenses and permits, pay bills, order documents, and make suggestions
- Use of social media and tools for online community engagement (including the use of an events calendar)
- Availability of public records
- Clear branding as the official municipal government site
- Robust search function
- Mobile-responsive design
- Details about municipal departments
- Visual appeal and overall experience

For more information, contact Daniel Yi at dyi@mma.org.

Foxborough was one of last year’s winners.

Town Report Contest entries due Oct. 31

The MMA is now accepting entries for the Annual Town Report Contest.

First-, second- and third-place winners will be selected from each of three population categories: less than 5,000; 5,001-15,000; and 15,000-plus. Winners will be recognized and given a certificate during the MMA Annual Meeting & Trade Show in January 2023.

Judging criteria include:

- Attractiveness of report cover and layout
- Material arrangement
- Presentation of statistics and data
- Summary of the year’s achievements
- Evidence of local planning for the future
- Practical utility of report
- Current and timely information
- Intuitive navigation tools and organization of material

Each entry will be reviewed by two judges, chosen based on their expertise in the field and their ability to remain impartial.

To enter electronically, please complete the form on the MMA website with a link to, or a PDF of, the town report. Or, send two copies of your town’s 2021 report to: Town Report Contest, Massachusetts Municipal Association, 3 Center Plaza, Suite 610, Boston, MA 02108.

Entries are due by Monday, Oct. 31.

For more information, contact Daniel Yi at the MMA at 617-426-7272, ext. 125, or dyi@mma.org.

Chatham took first place in last year’s Annual Municipal Website Awards for towns with populations between 5,000 and 12,000.
MMHR presents Skop Award to Dolores Hamilton

By Isabelle Jenkins

During its annual business meeting on June 16, the Massachusetts Municipal Human Resources association presented its 37th Emil Skop Award to Stow Assistant Town Administrator and MMHR Chair Dolores Hamilton.

The annual award recognizes outstanding contributions to the field of municipal human resources management and a positive impact on the association and its members.

Hamilton has more than 25 years of municipal experience, including as the human resources director for the cities of Newton and Framingham.

Her peers call Hamilton a champion of the field, due to her abundant knowledge and expertise, and her willingness to go above and beyond to help others.

Hamilton has been described as the “epitome of diplomacy and tact,” as well as a gracious and kind problem solver who manages everything that comes her way with style, dignity and grace.

Hamilton has long been an active member of MMHR. As its board chair since 2019, she led the association throughout the pandemic, overseeing a transition to two years of entirely remote programming, as well as a recent transition back to safe in-person events. Under Hamilton’s leadership, the association adopted its Commitment to Equity (visit the MMHR web page and click "read more") and has continued to prioritize issues of diversity, equity, inclusion and belonging.

Rachel Glisper, a former director on the MMHR Board and the Skop Award winner in 2021, presented the award.

Hamilton gave a brief association update to kick off the meeting, followed by votes to approve the fiscal 2023 board and budget.

Polito gives final address to mayors

Lt. Gov. Karyn Polito reflects on her seven-plus years of work with local officials and thanks mayors for their partnership during the July 20 meeting of the Massachusetts Mayors’ Association in Revere. Polito’s address will be her last to the group, as she and Gov. Charlie Baker are not running for reelection in November. The meeting also featured a presentation by Dan Rivera, president and CEO of MassDevelopment; a legislative update by MMA Executive Director Geoff Beckwith; and a walk to iconic Revere Beach.
Management Association awards 3 Galkowski scholarships

The Massachusetts Municipal Management Association in June awarded scholarships from the Nancy Galkowski Legacy Fund to the following three local officials:

- Joyce Corbosiero, executive assistant to the town administrator and Board of Selectmen in Clinton
- West Stockbridge Town Administrator Marie Ryan
- Lakeville Assistant to the Town Administrator Christina Cotsoridis

Galkowski had a 35-year career in municipal management in Massachusetts and a passion for mentoring younger managers and being of service to her peers. Following her death in 2013, her Management Association colleagues established a fund to honor her memory and continue her legacy. The fund accepts applications each spring.

MunEnergy webinar to cover energy costs, sustainability

The MunEnergy program will hold a webinar on Oct. 6 to provide timely information about energy costs and sustainability opportunities for cities and towns.

Local officials will have the opportunity to learn about issues affecting energy costs, including winter weather and the crisis in Ukraine. Participants also will hear about benefits of the MunEnergy program.

For 24 years, the MMA’s MunEnergy program has helped cities and towns manage energy costs through a program designed specifically for public entities.

For more information about the MMA’s MunEnergy program, visit the program’s webpage or contact MMA Deputy Executive Director Katie McCue at 617-426-7272, ext. 111, or kmccue@mma.org.

- Katie McCue

Let us know about your local news

Every day across the Commonwealth, municipal leaders are figuring out ways to deliver services more efficiently, save taxpayers money, engage more citizens in the vital work of local government, and improve the effectiveness of the layer of government that has the most direct impact on people’s lives. The MMA wants to recognize and help spread the word about these local creative solutions.

If your community has launched a new program or initiative, or has found a unique solution to a common problem, please let us know by filling out our new Local News Tips form on the MMA website.

STAM holds annual business meeting

Sandy Pooler, Arlington’s acting town manager, delivers a presentation, “Calculating the True Cost of an Employee,” during the annual business meeting of Small Town Administrators of Massachusetts on June 30 in West Brookfield. The meeting included a presentation by Stow Assistant Town Administrator Dolores Hamilton, who discussed how administrators of small towns can boost diversity, equity and inclusion; a presentation on keeping employees safe by Jean Haertl, president and founder of Safety and Respect at Work; and a legislative update from MMA Senior Legislative Analyst Jackie Lavender Bird.

Handbook for Massachusetts Selectmen available

The MMA’s Handbook for Massachusetts Selectmen, a 250-page comprehensive guide to the roles and responsibilities of select board members in Massachusetts, is available to all select board members for free in a digital format.

The 11-chapter searchable PDF covers subject areas such as administrative and regulatory responsibilities; financial management; human resources, personnel and labor relations; and land use and community development. It covers topics such as complying with the open meeting and ethics laws, making appointments, holding public meetings and hearings, town meeting, Proposition 2½, insurance, tax rates, collective bargaining, legal representation, public safety, public works, and the role of a town manager or administrator.

The handbook is sent by email to all new select board members following town elections.

To order the PDF, send an email to Isabelle Jenkins at the MMA at jjenkins@mma.org.

The handbook is also available as a hard copy, at a cost of $25 for MMA member communities and $49 for nonmembers. To order a hard copy of the handbook, visit the publications page of the MMA website. (There’s an additional $5 charge for postage.)

– MMA Senior Member Services Coordinator Isabelle Jenkins

LGAC examines proposed municipal finance changes

At the June 14 meeting of the Local Government Advisory Commission, Sean Cronin, senior deputy commissioner at the Division of Local Services, discusses municipal finance rule changes that were included in the administration’s proposed fiscal 2022 supplemental state budget. The changes would provide additional tools for municipal officials, including the ability to create special revenue accounts for situations such as the handling of opioid settlement funds.

Get MMA.org updates in your mailbox

The MMA offers a weekly email newsletter that provides a digest of all the updates posted each week on www.mma.org.

The MMA website is a great source for all the latest developments related to local government in Massachusetts. The email newsletter ensures that subscribers won’t miss any website updates, with a summary arriving in their mailbox every Friday morning.

The email subject line is “MMA Weekly Review.”

The MMA also offers a Breaking News email option that provides up-to-the-minute news on major stories.

To sign up for either or both newsletters, use the short and simple form at www.mma.org/about-mma/newsletter-sign-up.

– Meredith Gabrilska
intended schedule, an important achievement given the initial disruption caused by COVID-19.

The Legislature also recognized the challenge facing 135 “minimum aid” districts, which would have received just $30 per student in new aid over the previous year in the budget filed by the governor in January. The Legislature’s budget would double the minimum aid increase to $60 per student.

Special Education Circuit Breaker
H. 5050 would provide $441 million for the Special Education Circuit Breaker (7061-0012), which reimburses school districts for the high cost of educating students with disabilities. The Student Opportunity Act expanded the circuit breaker by including out-of-district transportation, to be phased in over three years. The fiscal 2023 budget bill reflects years two and three of the schedule in the Student Opportunity Act, achieving full funding one year ahead of schedule.

Charter school mitigation payments
H. 5050 includes $243 million for charter school mitigation payments (7061-9010), which would fund the state's statutory obligation as outlined in the Student Opportunity Act, pushing the state to phase in the plan by fiscal 2023, a full year ahead of schedule.

School transportation
The Legislature’s budget would level-fund regional school transportation at $82.1 million, representing a reimbursement rate of 85% of estimated costs for fiscal 2023 as estimated by the Department of Elementary and Secondary Education.

H. 5050 would fully fund the McKinney-Vento account for transportation of homeless students at $22.9 million, and level-fund out-of-district vocational transportation at $250,000.

PILOT
H. 5050 would increase Payments-in-Lieu-of-Taxes for state-owned land by 29% to $45 million. Inadequate PILOT funding has created a significant hardship for smaller communities with large amounts of state-owned property, so the proposed increase would provide an important boost.

Rural School Aid
H. 5050 would provide $5.5 million for Rural School Aid (line item 7061-9813), providing assistance to eligible towns and regional school districts. The grant program helps districts facing the challenge of declining enrollment to identify ways to form regional school districts or regionalize certain school services to create efficiencies.

Retiree COLAs
Outside Section 134 of the budget would allow retirement boards that have accepted Section 103 of Chapter 32 to award a cost-of-living-adjustment of up to 5% to retirees, rather than the current limit of up to 3%. Due to the potential negative impact on unfunded pension liabilities, the MMA opposed this section.

Community Preservation Act
Outside Section 174 would direct the state comptroller to transfer $20 million of the fiscal 2022 budget surplus to the Massachusetts Community Preservation Trust Fund. This provision would increase the state’s match percentage from an estimated 35% to 43%, approximately the same match rate as fiscal 2022. The number of CPA communities has reached 187, and this budget item would benefit cities and towns that have adopted higher local property taxes to address environmental and housing challenges.

REMOTE MEETINGS
Continued from page 1

guidelines that have been in place since the COVID public health emergency was first declared in March 2020. The previous extension of the remote meeting authorizations expired on July 15.

Chapter 22 of the Acts of 2022 also includes the following pandemic-related provisions and authorizations related to public boards and town meetings, all of which were MMA priorities for this year and are now extended through March 31, 2023:

• Open town meeting quorums: The bill would allow select boards, in consultation with their town moderator, to lower quorum requirements for open town meetings to not less than 10% of the existing quorum level. The quorum provision includes a seven-day notification requirement before any select board vote.
• Remote representative town meetings: The bill would permit representative town meetings to once again have the option to meet remotely, if approved by the select board and town moderator, as well as the town meeting when it meets.
• In May, the Senate had included a remote meeting extension in its fiscal 2023 state budget as an outside section, but with the July 15 expiration approaching and the state budget tied up in negotiations, the Senate advanced the language as a standalone bill on July 5.
• The House passed an extension bill on July 7, but the House version included language that would have created a permanent mandate for remote access to all public meetings, aside from those in executive session, with a provision requiring remote participation by the public if public participation is allowed or required at the meeting. The mandate would have gone into effect on April 1, 2023.

The MMA worked with its members and stakeholders across the Commonwealth to clarify that, despite the good intentions of the House bill, such an unfunded mandate presented unworkable financial, technological, logistical, and practical challenges for cities and towns. The Legislature took these concerns seriously and removed the mandate from the bill.

The MMA will continue to push for a permanent solution that gives municipalities the flexibility and funding they will need to expand participation and engagement through remote and hybrid meetings.
Green and Hogeland said they want someone to track HR trends, update policies to reflect new regulations, and oversee training to reflect evolving workplace expectations, to shield the communities from potential liability.

With the $100,000 grant, officials expect to spend about $89,000 to cover the first year of the person’s salary ($65,000 plus health insurance and retirement), with the remainder covering a workstation and technology needs. The communities will fund the position’s second year themselves, and evaluate the arrangement after that. The percentage of each community’s share would correspond to population size, with North Adams assuming the largest portion (45%), and the other communities assuming roughly similar shares of the remainder.

Officials hope that an HR director will bring new ideas to address recruiting difficulties, a problem faced by municipalities throughout Massachusetts but made more challenging by the Berkshires’ remote location. They also hope that the shared process will lessen their chances of hiring employees away from each other, an ongoing issue faced by many communities.

Realizing that the municipal hiring crunch could hinder their effort to find an HR person, the communities secured grant language allowing them to engage an HR consulting firm if they’re unable to fill the position.

The officials also stressed the position’s importance for diversity, equity and inclusion efforts. Green said the HR director could help them identify any barriers to creating more diverse workforces, and adjust recruiting practices accordingly.

Hogeland also focused on the need for training to ensure that employees are respectful to each other and to the public.

“I think it is important for all the towns, particularly given the environment over the last several years, to make sure that they get the training on cultural competency and unconscious biases,” Hogeland said.

Though the position will have an expected breakdown of responsibilities, officials said they anticipate periods when one community needs more HR coverage, depending on situations such as collective bargaining issues, onboarding or employee departures.

“Over time, we’ll figure out how it works,” Hogeland said, “and how to make it work.”

- Jennifer Kavanaugh

### Milford, Natick

#### Green infrastructure projects reduce pollution and mitigate flood risks

Green stormwater infrastructure projects are underway in Milford and Natick, two towns located along the headwaters of the Charles River, that will help to address river pollution and flooding concerns. The work is being done in collaboration with the Charles River Watershed Association.

Milford worked with the CRWA from 2018 to 2020 to develop a substantial subwatershed restoration plan for the area surrounding Milford Pond. The plan looked for opportunities to naturally filter stormwater runoff to increase ground water levels and treat the stormwater.

The project also identified key areas in the town for protection and conservation that would improve healthy land and river use, and strategies to assist the town with climate change impacts such as flooding and drought. A total of 69 areas were identified to implement green infrastructure projects.

“From that process, the plan we proposed looked at nutrient reduction,” said Robert Kearns, climate resilience specialist at the CRWA, “to support a cleaner Charles River and for the town to comply with the [federal stormwater] MS4 permit.”

The Milford project consists of a system designed to store and filter stormwater, and two rain gardens designed to help filter water, which are nearing completion. The Parks Department will be responsible for the maintenance of the rain gardens, and the Highway Department will maintain the filtering system.

“Essentially it’s going to take the water...”
from the surrounding streets and divert the water into this underground infiltration space that will store it during a flood event but also filter it back into the groundwater,” Kearns said. “Traditionally, with street drainage, it goes directly into the river.”

The rain gardens will reduce the level of phosphorus, a main pollutant found in the Charles River that commonly results from decomposing leaves, fertilizers and detergents. The rain gardens will also help to recharge water back into the ground.

The project is expected to reduce the amount of phosphorus running into the Charles River by 25 pounds annually, Kearns said, and will recharge about .5 acre-feet of rain annually (equivalent to the volume of 55 concrete mixer trucks) into the groundwater.

Milford and the CRWA conducted significant community outreach about the projects in English, Spanish and Portuguese, providing education to students, presentations at town meetings and via Milford TV, and conducting a public survey. Explanatory signs will be located at each system.

The town has received $419,000 for the project from the state’s Municipal Vulnerability Preparedness program. An additional $163,000 is contributed by the CRWA.

“The decisions made on land use upstream are impacting downstream,” Kearns said. “The Charles River flows through many communities, and the pollution makes its way down. ... The nutrient pollution from stormwater is what causes a lot of the algae blooms the river experiences.”

The Charles River flows through 23 cities and towns, but its watershed includes 35 communities.

Green stormwater infrastructure projects in Natick — currently in the early design phase — are looking at green streetscape improvements that would allow water runoff to be diverted from streets into filtration systems like those in Milford.

The nearby town of Franklin has also completed green stormwater infrastructure projects such as rain gardens, and has removed pavement from some areas to reduce the amount of impervious surfaces.

Athol, Royalston

**Towns partner to provide wastewater services**

The Worcester County towns of Athol and Royalston have entered into a three-year agreement for shared wastewater services, further solidifying the cooperation between the communities in their quest to provide cost-effective municipal services.

Following an 18-month pilot program, the towns began a three-year agreement on July 1 that has three Athol employees servicing a small wastewater plant in south Royalston. According to officials, the partnership provides Royalston with wastewater services for half the amount charged by the private sector, puts extra money into Athol’s wastewater enterprise fund, increases the incomes of Athol wastewater workers, and protects the nearby Millers River.

“It’s just better for everybody,” said Athol Town Manager Shaun Suhoski. “Better for the river, better for the communities, better financially for the ratepayers — and that’s why we’re really happy that we’ve got this signed up for the foreseeable future.”

Officials from both communities credit their history of collaboration for the success of the wastewater partnership so far. The two towns already share a school district, and participate in regional veterans’ and animal control programs.

Royalston had been seeking a more permanent wastewater solution after its operator quit a few years back, said Deb D’Amico, chair of the Royalston Select Board. The town hired a retired operator to help out, she said, and he asked Athol wastewater workers to help operate the plant, as independent contractors during their off hours.

Meanwhile, Royalston sought proposals for a private contractor to operate the plant, which serves about 52 homes. The plant had been made larger to support additional development that never materialized, making it more expensive to operate per ratepayer, she said. Royalston soon found out just how expensive — when it received bids for $130,000 to $150,000 a year.

“We are a very small town,” D’Amico said. “We just did not have the budget for that, and we couldn’t ask our ratepayers to shoulder that expense.”

As officials sought an answer to their wastewater problem, D’Amico said, employees coordinated a plan and approached them with the idea for a joint operation.

“One of the nice things about this is that it wasn’t the leaders of the towns who came up with this,” D’Amico said. “It was...
Towns add safety specialists to reduce risk

By Joyce McMahon

Adopted by private and public entities alike, a strong safety culture can prevent injuries, reduce operating exposures, and save money.

A strong safety culture is an organization’s shared perceptions, beliefs, values and attitudes that create a commitment to safety and an effort to minimize harm. This is often the foundation of a shared safety goal. In many industries, workplace safety is considered every employee’s responsibility.

In February 2019, a state law went into effect that applies federal Occupational Safety and Health Administration standards for workplace safety standards to municipal workers. The state law is overseen by the Department of Labor Standards.

OSHA requires employers to keep their workplace free of serious recognized hazards. The regulations are vast and spread across a variety of industry and workplace categories. The regulations run the gamut from fire prevention and evacuation strategies to toxic materials handling, safe driving, and proper blasting techniques.

Given the depth and breadth of knowledge required to meet OSHA standards, including reporting and training, some MIIA members opt to hire individuals to help them attain compliance and create safe workplaces.

Chelmsford’s broad view

Following a lengthy career as a safety consultant, Steven Cerven is now the municipal safety specialist in Chelmsford, where he has spent the last three years working with town employees to “make sure they go home in the same condition they came in.”

“Every employee has a moment of truth,” he said, describing the choice between taking an action that is safe or another that might be quicker but could get them into an unsafe situation. “As the safety specialist, I spend time getting to know the employees and earning their trust. They know I’m not here to be the safety police, I’m working with them to help keep them safe.”

His daily activities can range from checking on a trench project, to working with the Board of Health on blood-borne pathogen safety training, to examining a playground set or inspecting a roof.

“We have a plan to deal with OSHA requirements,” he said. “Then we learn and add to it. Employee training is also a big part of the job.”

Plymouth focuses on public works

In February 2021, Plymouth hired Michelle Newell as the town’s first safety compliance officer for the Department of Public Works. A 2016 graduate of Keene State College with a bachelor’s degree in occupational safety and health, Newell brought safety compliance experience from her previous jobs at MassPort and Feeney Brothers, a natural gas utility contractor.

“At first people thought I was the police,” she said, “and they were hesitant to work with me.”

But after talking with them and working on training efforts, she said, “Now it’s a total 180. They understand I have their back and am working to make sure...”

MIIA receives Health Value Award for employee engagement

At its fifth annual awards ceremony in May, held during the Healthcare Innovation Congress, the Validation Institute presented the Health Value Award for Employee Engagement, Large Category, to MIIA.

The Health Value Awards recognize employers and solution providers who have implemented health, benefits, and/or wellness programs for their population with demonstrated significant cost-savings and/or improvements in health outcomes.

Validation Institute CEO Benny DiCecca said, “The employers and health care solution providers participating in the Health Value Awards demonstrate they are not only committed to providing high-quality, value-based health care, but are ready to lead the industry in a new, exciting, and necessary direction.”

MIIA Executive Vice President Stan Corcoran said, “It is an honor to have the hard work and dedication of the MIIA Health and Well Aware teams be recognized by this group of industry experts. More importantly, our success comes from the commitment of our members, who endeavor to lead healthy lives.”

In its award-winning essay, MIIA wrote, “We strive to help our members create a culture where all employees and family members live healthy, vibrant, and productive lives. We help create an energized workforce and wellness climate — a great place to work where employees feel valued and supported and are encouraged/motivated to make healthy choices.”

MIIA’s member groups are assigned a dedicated MIIA Wellness representative to help them build strong wellness programs at their worksites.

Continued on 27

AWARD continued on 27
The depth of MIIA’s programming includes Wellness Grants that focus on building a supportive culture and target specific needs of members; Wellbeing Smorgasbord, which includes free, self-directed wellness challenges; and Webinar Buffet, which educates and brings awareness to members on various health/wellness topics.

MIIA also recognized its partners that help employees save money on health care costs and stay healthy. They include Blue Cross Blue Shield of Massachusetts, Quizzify, Headspace, SmartShopper, Abacus Good Health Gateway diabetes management, Ompractice platform for virtual live yoga/meditation classes, AllOne Health EAP, IMC’s Joint Strong Program for musculoskeletal health, Learn to Live for cognitive behavioral therapy virtually, and Brown University for mindfulness programs taught by internationally recognized instructors.

"MIIA is grateful to the Validation Institute for its recognition of our health and wellness programming," Corcoran said. "We are committed to continuing to build our wellness programming so that it always serves the needs of our members.”

The Validation Institute, based in Woburn, is a membership organization made up of a network of health care vendors, health benefits advisors, and purchaser benefit managers focused on delivering better health value and stronger outcomes than conventional health care.

**MMA-Suffolk program graduates 2021-22 class**

On June 15, 23 people graduated from the 18th MMA-Suffolk Local Government Leadership and Management Certificate Program. At a ceremony in Boston, Adam Chapdelaine, former Arlington town manager and former MMA president, was the graduation speaker. North Andover Deputy Town Manager Denise Casey addressed the graduates as the faculty speaker, and Christopher Sicuranza, who recently became the chief of staff to Haverhill Mayor James Fiorentini, was the student speaker.
ful emissions, the court has now ruled that when the Clean Air Act was passed, Congress did not envision the need to reduce carbon emissions via a Clean Power Plan, and thus the EPA cannot act on the newer climate change challenge without clearer congressional authorization.

With a stalemated U.S. Senate, this ruling means that local and state efforts to combat climate change through regulations on fossil fuel usage and emissions will be easily thwarted by other states that fail to act. High carbon emissions from West Virginia and other coal-heavy states will keep the Northeast from advancing a collective agenda to meet aggressive emissions reduction standards. Even as a number of cities and towns in Massachusetts are looking at implementing leading-edge stretch energy code standards, the impact of these local efforts will be more than offset by the coal industry’s ability to continue with business as usual, now that the EPA will be powerless to create minimum standards to reduce coal-generated emissions.

Policy areas such as environmental regulation require a coordinated effort at the municipal, regional, state and national levels. When the SCOTUS ruled that the EPA lacked sufficient authority, that cast municipalities and states on their own to deal with one of the greatest challenges of our time. This is one example of how a narrow perspective on government’s authority to act on modern challenges can impede progress in addressing vital issues. Again, this rearview-mirror fixation makes it harder to see and avoid dangers in the road ahead.

In the third decision, Kennedy v. Bremer ton School District, the court reversed a school department’s suspension of an employee, the assistant football coach, for repeatedly engaging in a mid-field prayer after football games, gathering student players around him in a public display of his religion. The school department had asked the coach to stop the practice, out of concern that a reasonable observer would conclude that the district was endorsing his religion, and that students would feel pressured to participate even if they preferred not to or had different religious beliefs.

The court stated that it was adopting a changed interpretation of the Establishment Clause of the Constitution, that “accor(ds) with history and faithfully reflect[s] the understanding of the Founding Fathers” who, of course, overwhelmingly Christian in their beliefs.

This ruling will make it more difficult for municipalities and school districts, who are exceedingly careful to maintain proper separation of church and state, to enforce personnel policies designed to protect religious minorities from forced religious expressions. When speaking as a government employee, individuals are not protected by the free speech doctrine when they seek to impose their religion or beliefs on others. This court ruling, however, has blurred the lines, by ruling that the coach could engage in a public display of religion on public property during his public employment, because he was acting as a private person.

Freedom of religion is a bedrock principle that we all take for granted. Respect for all religions is a corollary that enhances our communities and allows us to build welcoming and inclusive neighborhoods and governments. As the court based its ruling in this case on a narrow scope, it has created a much broader and more complex context for schools and municipalities. With this new precedent in place, communities will surely confront multiple situations that will challenge existing policies and practices designed to draw clear lines between the private beliefs of employees and the interactions of those same government employees in public settings.

Guns, climate, and religion. These are some of the most controversial and divisive topics of our time. Local officials across the state have wide-ranging views on these issues, and the MMA deeply respects all these viewpoints. The common theme here is that these three rulings by the SCOTUS reduce municipal discretion to address very real challenges that exist in our communities. Local police chiefs are weaker today, less able to exercise their judgment in issuing concealed-carry gun licenses. Municipal planners cannot build on the EPA’s coal-emission regulations and are acting on environmental agendas in greater isolation. Municipal managers have less authority today to proactively manage their workforces to create spaces that are less likely to spur conflict over competing private religious beliefs.

In other words, in a way that may not have been noticed last month, these rulings have made the jobs of municipal leaders more difficult on many of the more conflict-ridden issues that confront our communities.

Jennifer Kavanaugh

**COMMONWEALTH**

**Continued from page 25**

the folks who actually were working on the system.”

During the pilot phase, Athol workers initially had to spend significant time at the plant to get it in compliance with state and federal environmental regulations, given that the plant had been operated for so long with part-time and retired workers, said Dick Kilhart, Athol’s public works superintendent. Once the workers developed a routine and a better understanding of the plant’s needs, he said, they were able to decrease the number of hours needed in Royalston.

During the first year of the three-year agreement, Royalston will pay Athol $5,205 monthly, or $62,460 a year, for the plant’s operation. The payments will then increase by 2.5% annually. Royalston will pay for the plant’s capital, chemical, analytical and utility costs.

Athol’s three wastewater employees will receive annual stipends of $5,000 to $6,000, depending on their job title. Any additional funds left over will go into Athol’s wastewater enterprise fund, giving ratepayers an additional cushion for expenses related to the system.

D’Amico said she sees the partnership possibly extending well beyond the three-year agreement, and Suhoski said they might be able to build a small training capacity to increase the pipeline for wastewater expertise — and eventually be able to hire an additional employee devoted to the Royalston work.

Given that many wastewater operators are approaching retirement and the state faces a shortage, Kilhart said he hopes this partnership will encourage other regionalization efforts to address the shortage.

— Jennifer Kavanaugh
People

Sandy Pooler became Arlington’s new acting town manager on June 18, with an appointment lasting through July 2023. Pooler has been working in Arlington since 2016, first as deputy town manager and since 2018 as deputy town manager/finance director. Previously, he served as finance director in Amherst from 2011 to 2016, and worked for 11 years in Newton, first as the chief budget officer and then as the city’s chief administrative officer. He previously served as legal counsel to several committees in the House of Representatives, and had been a law clerk for a federal district judge in California.

Pooler earned a master’s degree in public administration from the Harvard Kennedy School; a law degree from the University of California, Los Angeles; and a bachelor’s degree in history from Dartmouth College.

Pooler takes over from Adam Chapdelaine, who stepped down as town manager on June 17 after a decade in the role. In September, Chapdelaine will become the first deputy director of the Boston Green Ribbon Commission, which is working to accelerate the implementation of Boston’s Climate Action Plan.

Chapdelaine, who served as the MMA’s president in 2021, has a long background in public service, including two years as the deputy town manager in Arlington and work for the city of Fall River (where he grew up), the Greater New Bedford Workforce Investment Board, and for former Sen. Joan Menard. He earned a master’s degree in business administration from Suffolk University and a bachelor’s degree in political science from UMass Dartmouth.

Edward Augustus stepped down on May 31 as city manager in Worcester and was named the next day as the new chancellor of Dean College in Franklin.

In March, Augustus announced that he would end his tenure as Worcester’s sixth city manager, a role he had held since early 2014. He officially began as Dean College’s chancellor on July 5. A Worcester native, Augustus had previously served as an appointed member of the city’s Human Rights Commission and an elected member of the Worcester School Committee for two terms.

Augustus has also worked in state and federal government, as well as in academia. He served in the Senate from 2005 until 2009, and served for several years as chief of staff for U.S. Rep. James McGovern, and as an employee in the U.S. Department of Education. He also worked for three years as the government and community relations director at the College of the Holy Cross.

After Augustus announced his departure, the City Council appointed Eric Batista as acting city manager. Batista has been working for the city for the past decade, initially as the chief of operations and project management in the city manager’s office. In 2019, he became director of the Office of Urban Innovation, and last fall he was promoted to the role of assistant city manager.

Robert Menicocci became the new town manager in Williamstown on July 1.

Most recently, Menicocci spent more than eight years at the Santa Clara County Social Services Agency in San Jose, California, starting as chief deputy director for a year before becoming chief of staff. Menicocci earned a bachelor’s degree in public administration from California State University, Fullerton, and a master’s degree in public management from the University of San Francisco.

In Concord, Lafleur replaces Stephen Crane, who resigned in December and soon after began serving as acting town manager in Wayland.

In Wenham, Poulos replaces Anthony Ansaldi, who left in November 2020 to become town administrator in Littleton. Tom Younger had been serving as the interim administrator.

After six months serving in an interim capacity, Kerry Lafleur became the permanent town manager in Concord on July 1.

Lafleur has been working for Concord for almost six years, mostly as chief financial officer and treasurer-collector. She took over as interim manager on Jan. 1. Previously, she served almost nine years as town manager in Lunenburg, and had served as a finance director in Chelmsford, Sudbury and North Andover. She had also served as a town manager in Cave Creek, Arizona, and as assistant to the city manager in Manhattan, Kansas. She earned a bachelor’s degree in paralegal studies at Notre Dame College and a master’s degree in public administration from Rutgers University.

In Concord, Lafleur replaces Stephen Crane, who resigned in December and soon after began serving as acting town manager in Wayland.

Steve Poulos became the new town administrator in Wenham on May 23.

Poulos had been the chief financial officer in Marblehead since early 2021 and served in Danvers from 2015 to 2021 in roles including chief procurement officer, chief

assessor and deputy finance director. He was the associate assessor in Bedford from 2013 to 2015.

Poulos earned a bachelor’s degree in business from Salem State University and a master’s degree in public administration from Suffolk University. He also completed the 2017-2018 MMA-Suffolk University Certificate in Local Government Leadership and Management program.

In Wenham, Poulos replaces Anthony Ansaldi, who left in November 2020 to become town administrator in Littleton. Tom Younger had been serving as the interim administrator.

After six months serving in an interim capacity, Kerry Lafleur became the permanent town manager in Concord on July 1.

Lafleur has been working for Concord for almost six years, mostly as chief financial officer and treasurer-collector. She took over as interim manager on Jan. 1. Previously, she served almost nine years as town manager in Lunenburg, and had served as a finance director in Chelmsford, Sudbury and North Andover. She had also served as a town manager in Cave Creek, Arizona, and as assistant to the city manager in Manhattan, Kansas. She earned a bachelor’s degree in paralegal studies at Notre Dame College and a master’s degree in public administration from Rutgers University.

In Concord, Lafleur replaces Stephen Crane, who resigned in December and soon after began serving as acting town manager in Wayland.

Robert Menicocci became the new town manager in Williamstown on July 1.

Most recently, Menicocci spent more than eight years at the Santa Clara County Social Services Agency in San Jose, California, starting as chief deputy director for a year before becoming

Robert Menicocci
agency director. Previously, he served two years as the deputy commissioner of management and budget for the Massachusetts Department of Mental Health, from 2012 to 2014; two years as the deputy director for administration for Lake County Behavioral Health in Lakeport, California; six years as the director of government services for AP Associates in Newbury; and two years as fiscal manager for the Santa Barbara County Department of Social Services in California. He also served a dozen years in various finance roles at the Massachusetts Department of Transitional Assistance. He earned a bachelor’s degree in fine arts and art history from Brandeis University. In Williamstown, Menicocci replaces Jason Hoch, who left last year after about six years in the role. Charles Blanchard had been serving as the interim town manager.

Sullivan earned a bachelor’s degree in marine safety and environmental protection from the Massachusetts Maritime Academy, and a master’s degree in public administration from Suffolk University. On July 6, Christopher Sicuranza became the new chief of staff to Haverhill Mayor James Fiorentini. Sicuranza served for the past year as the chief administrative officer in Gloucester, and was Gloucester’s director of communications and constituent services from 2016 to 2018. He also served as the communications lead manager for the Massachusetts Comptroller’s Office from 2019 to 2021. Sicuranza also has private-sector experience in communications and marketing at several companies and organizations. He earned a bachelor’s degree in communications/public relations from Salem State University, and in June he graduated from the MMA-Suffolk University Certificate in Local Government Leadership and Management program.

In Haverhill, Sicuranza replaces Allison Heartquist, who had served in numerous roles in the mayor’s office since 2014 before leaving last month.

Laura-Jean Washington joined the Fall River City Council on June 2, filling a seat left open by the resignation of Trott Lee two days earlier. Washington had been a runner-up in the November 2021 City Council election, and was the next eligible candidate in line to become a councillor, after the candidate ahead of her had turned down the seat.

On June 13, Darren Costa was sworn in as Everett’s new Ward 3 city councillor, replacing Anthony DiPierro, who stepped down on May 23. Costa had been the runner-up in the 2021 Ward 3 election.

Sarah Etelman, who had served on the South Hadley Select Board since 2013, died on June 3 at age 53 after a battle with cancer. Etelman was the board’s vice chair and had also served as a Town Meeting member.

Etelman worked for several Pioneer Valley nonprofits and organizations, including eight years as the training services manager for CareerPoint (now MassHire) in Holyoke, and most recently as the development director for Girls Inc. of the Valley, where she had served in several roles since 2011. She also served on the board of the South Hadley Farmers’ Market and had worked with the South Hadley Community Coalition to Prevent Suicide. Shortly before her death, she received a Dream Maker Award from Girls Inc. for her service to the organization.

Four days after Etelman died, her Select Board colleagues appeared at their next meeting wearing shades of purple, her favorite color, and placed a vase of purple irises behind her nameplate.

David Cortese, who had served on the Douglas Board of Selectmen since 2015, died on July 7 after a brief illness. He was 60. Cortese was the board’s vice chair at the time of his death. He had been an attorney with a law practice in Auburn. Previously, he served for 27 years as a trooper on the Massachusetts State Police, where he served on the motorcycle team.

People

Continued from page 29

Dennis Town Administrator Elizabeth Sullivan became an International City/County Management Association credentialed manager this spring, joining about three dozen municipal managers in Massachusetts. ICMA credentialed managers must demonstrate that they have acquired significant experience as a senior management executive in local government; have earned a degree, preferably in public administration or a related field; and have demonstrated a commitment to integrity and to lifelong learning and professional development.

Sullivan has been working for the town of Dennis since 2015, serving as assistant town manager and as interim administrator before becoming town administrator. Before coming to Dennis, Sullivan spent almost a decade in Plymouth, as the conservation planner and then as special assistant to the town manager. She also worked as the natural resource officer for the town of Falmouth.
PEOPLE
Continued from page 30

out of the Holden Barracks, on the C Troop Community Action Team, as vice president on the Police Union Board, and as a board member for the State Police Museum. He also taught criminal justice for several years at Becker College.

James Kelcourse

Kelcourse, an attorney, most recently served as the ranking minority member on the Joint Education Committee, and had also served on the House’s Human Resources and Employee Engagement Committee; the House Ways and Means Committee; the Joint Committee on the Environment, Natural Resources and Agriculture; and the Joint Ways and Means Committee. Before becoming a state representative, he served for four years as an at-large city councillor in Amesbury. The First Essex District includes Amesbury, Newburyport and Salisbury.

Lily Rancatore

joined the MMA on July 18 as the education and training coordinator in the Communications and Membership Division. In the newly created position, she will coordinate training sessions across membership groups and provide logistical support for the MMA’s municipal diversity, equity and inclusion training and events, among other duties. Rancatore comes to the MMA with experience as a trainer, program manager and DEI employee training consultant.

Previous experience includes roles as a logistics and communications coordinator for MOVE LLC in Hopkinton, as lead designer and search engine optimization specialist for Visionaria Consulting in Hopkinton, and as an SEO business consultant for Magnify Consulting in New York City. Her DEI consulting work was for FeeBee John Coaching & Consulting in Westchester, New York. She earned a bachelor’s degree in psychology and a master’s degree in industrial/organizational psychology, both from Fairfield University.

Daniel Yi joined the MMA on July 18 as the new research and project assistant in the Legislative Division.

Previously, Yi was a legal and marketing assistant for the law firm Merritt & Merritt. Last year, he participated in Teach for America as a corps member, teaching in middle schools in San Antonio. He also worked for more than two years as an office assistant at Boston College, and has worked as a political operations intern. Other experiences include volunteering for EVkids, a tutoring nonprofit, and at the Pine Street Inn; writing and researching for the Asian Journal of Political Science; and working with Americorps. In 2021 he graduated summa cum laude from Boston College, with a bachelor’s degree in political science.

On June 23, Pranav George joined the MMA as a database intern for the summer, working with communities to update their information in the MMA database.

In the fall, George will be a senior at the University of Connecticut, majoring in business. He has worked as a customer service representative for the town of Lexington; as a summer intern at the Massachusetts State House, conducting research on criminal justice and managing computer records, among other responsibilities; and as a summer intern in the director’s office of the Edith Nourse Rogers Memorial Veterans’ Hospital in Bedford. At UConn, he has worked as a resident assistant, and has served as a senator in the university’s undergraduate student government.

After eight years with MIIA’s wellness team, Courtney Hernandez became the new MIIA wellness manager on July 18.

Since 2014, Hernandez had been a wellness representative on the MIIA team and for the past eight years, she has also been a term lecturer for nutrition at the MGH Institute of Health Professions, where she was previously a teaching assistant for four years.

She had worked as a wellness account manager, and then senior wellness account manager, for Wellness Workdays in Hingham, from 2006 to 2014. Her work on health-related topics has been published in journals and magazines, including an October 2011 article, “Top Ten Wellness Program Mistakes,” in Benefits Magazine. She earned a master’s degree in nutrition communication from Tufts University, and a bachelor’s degree from Boston College, in both English and in secondary education.

Hernandez takes the place of Wendy Gammons, who retired from MIIA on June 30 after 24 years of providing wellness services to MIIA members.

Gammons started with MIIA in 1998 as the wellness coordinator — and MIIA’s only wellness employee. She ultimately became the wellness manager, and over the years she helped build a wellness team of 11 employees with a broad array of programming for members.

Before coming to MIIA, Gammons was an assistant professor in the Allied Health Department at the Oregon Institute of
The following are new select board members elected in annual town elections from May 21 through June 27. **Highly regarded manager Wayne Marquis passes**

By Jennifer Kavanaugh

Wayne Marquis, a longtime Danvers public servant who set the “gold standard” for municipal management and dedicated his time to both the MMA and MIIA, died on June 8 at age 69 after a battle with cancer.

Marquis had served as the town manager in Danvers from 1979 until his retirement in 2014, which made him the state’s third longest-serving town manager at the time. Before becoming town manager, he had served for a few years as the assistant town manager, giving him a total of almost four decades of service to the town.

Marquis served as an MMA policy committee member and chair, was deeply involved in the leadership of the Massachusetts Municipal Management Association and the International City/County Management Association, and was instrumental in the success of MIIA, as a founding board member and chair of the board for many years.

MMA Executive Director Geoff Beckwith remembered Marquis for his kindness, his respectful and gentle approach to issues, and his effective leadership.

“Wayne will always be remembered as the gold standard for professional management, and for living his life following the Golden Rule, treating every person with dignity and respect,” Beckwith said. “He was a mentor, a life-long learner, a deeply skilled manager, and a true public leader who inspired his friends and colleagues to be their best selves at work and at home. The MMA, MMMA and MIIA are all better thanks to his longtime support and involvement.”

A lifelong Danvers resident, Marquis is also being remembered for numerous contributions to the town, including his leadership in modernizing the town’s municipal electric division, Danvers Electric; his role in the effort to transform the Essex Agricultural School into what is now the Essex North Shore Agricultural and Technical School; and his service to residents after a chemical explosion in Danversport destroyed or damaged dozens of homes just before Thanksgiving in 2006.

After retiring, Marquis continued to serve on the Danvers Retirement Board, and served on Salem State University’s board of trustees. He was also engaged with numerous other civic and community organizations.

Marquis leaves behind Nancy, his wife of 46 years, two children and two grandchildren.

The city of Lawrence is an Equal Opportunity Employer. Reasonable accommodations are provided to applicants with disabilities. If you need reasonable accommodations for any part of the application and/or hiring process, please notify the Personnel Director at 978-620-3060. The deadline to grant reasonable accommodations will be made on a case-by-case basis.

Project Manager
Massachusetts State College Building Authority
Seeking an experienced project management professional with several years’ relevant experience in architecture/engineering. The Project Manager provides direct support to their assigned campuses, including management of all initiatives (new construction, renovation, building system repairs). A successful Project Manager will maintain successful working relationships with campus constituents. Project Managers are also expected to actively contribute to the strategic growth of the MSCBA. The position requires presence in our Boston office and regular travel to meet with campus constituents. Visit our website at www.mscba.org. Under “Recent News” find the full job description and specific minimum/preferred qualifications. To apply, submit a cover letter/resume to careers@mscba.org.

Wastewater Treatment Operator
Charles River Pollution Control District
The Charles River Pollution Control District, a medium-sized wastewater treatment facility, is seeking a candidate for the position of Wastewater Treatment Operator. The position requires a minimum of a Massachusetts Wastewater Operator Grade 4 License or the ability to obtain one within six months of hire. Training will be provided. The Wastewater Treatment Operator is part of a team that monitors, operates and troubleshoots the plant equipment, treatment process including screenings/grit, biological and chemical nutrient removal activated sludge system, chlorination/dechlorination system and GFT sludge system. Responsibilities include but are not limited to daily monitoring and inspection of the plant, recording plant information displayed on meters and gauges, opening gates and valves, cleaning tanks, monitoring chemical feed systems, accepting chemical deliveries, assisting in maintaining a clean and orderly facility, collecting samples from the process and in the collection system, and monitoring septic tank receiving. The position requires working with and understanding SCADA and working in confined spaces. Weekend, holiday, on-call and response during emergencies are required and compensation will be provided for such. Hourly rate ranges from $22/hour to $26/hour and will be based upon experience and qualifications. Competitive benefits are offered which includes the Norfolk County Retirement System. Please send a cover letter and resume to Janice Healy, Charles River Pollution Control District, 66 Village St., Medway, MA 02053 or email: jhealy@charlesriverpcd.org.

Town Planner
Town of Wayland
Union/Grade: G-8/AFSCME. Salary Range: $79,537-$104,750. Description of Position: The town of Wayland seeks qualified innovative candidates for the full-time Town Planner position. Primary responsibilities are to support the Town Manager, Planning Board, and Select Board in matters related to planning, housing, and economic/community development. Town Planner assists the Planning Board in reviewing and evaluating applications (ANR’s, Subdivisions, Site Plan Approval, Special Permits, Scenic Roads, etc.) and fulfilling all of its statutory and regulatory obligations. Keeps the Town Manager and planning board apprised and up-to-date on municipal matters and on changes in land use laws and regulations. Town Planner provides support to the Town Manager, planning board, and select board in developing recommendations for growth and development in the town. Supports the Planning Board in developing required statutorily authorized plans such as: town master plan, housing production plan, and other visioning documents as may be requested. Provides support for revisions to zoning bylaws and regulations. See full job description. Recommended Minimum Qualifications are as follows: Education: Bachelor’s degree in planning or a related field of endeavor; master’s degree preferred. Experience: An additional four years of related experience may be substituted for the planning degree requirement. Licenses/Certificates: Must possess a valid driver’s license to operate a motor vehicle; American Institute of Certified Planners (AICP) Certification is preferred. Closing date: Open until filled. Apply to: Send resume and cover letter to the Human Resources Manager to hr@wayland.ma.us. The town of Wayland is an Equal Opportunity Employer.

Town Clerk
Town of Wayland
Union/Grade: N-8 non-union. Salary Range: $73,097-$95,377. Description of Position: The town of Wayland seeks highly qualified innovative candidates for the full-time position of Town Clerk. The Town Clerk performs professional administrative and supervisory work in accordance with applicable federal and state laws and regulations and town bylaws. Responsible for conducting elections, registering voters, recording and issuing vital records, conducting the Annual Town Census, recording and maintaining town meeting records, maintaining official municipal records, issuing various licenses and documents, and serving as a source of public information on a wide variety of subjects relating to municipal government. Must have strong managerial skills, ability to manage multiple projects under time constraints and the ability to communicate both verbally and in writing with residents, department managers, state officials and board committee members. Knowledge of federal, state and local laws, regulations and bylaws regarding voter registration and elections is a strong plus. For the full job description click here. Recommended Minimum Qualifications: Bachelor’s degree in public administration, business management or related subjects and experience in municipal operations is desirable, including supervisory experience, or any equivalent combination of education and experience. Over three years of progressively responsible experience in public administration, records management, office management, or a related field desired. Licenses/Certificates: Must be bondable; must attain Notary Public status within six months; Justice of the Peace preferred; Certified Municipal Clerk (CMC) or Massachusetts Municipal Clerk Certification (CMCC) preferred. Closing date: Open until filled. Apply to: Send resume and cover letter to the Human Resources Manager to hr@wayland.ma.us. The town of Wayland is an Equal Opportunity Employer.

Project Manager
Framingham Public Schools
Framingham Public Schools Buildings & Grounds Department seeks a highly responsible and qualified Project Manager to support district infrastructure improvement projects. The Project Manager is responsible for managing multiple aspects of the district’s planning, design, budget, renovation, and construction processes. Provides project management and oversight for various construction projects, including building, exterior envelope repairs; roof repairs and replacements; paving and stormwater improvements; ADA compliance upgrades; etc. Candidates must have a minimum of three years of similar experience and knowledge of Massachusetts State Procurement Laws. Salary range up to $90,000. See complete position description here.

Municipal Energy Services
Through the MMA’s MunEnergy program, MMA members have access to an energy contract designed exclusively for Massachusetts cities and towns. The MunEnergy program offers access to energy experts at Constellation, a vetted municipal energy contract, and options for sustainability programs. Energy professionals at Constellation, the MMA-endorsed supplier for MunEnergy, work with municipalities to manage electricity costs for the long-term. Constellation is also on the forefront of sustainability programs and provides financial support to the MMA for its promotional and marketing efforts. To learn more, visit [www.mma.org/munenergy](http://www.mma.org/munenergy). To be notified about MunEnergy events, send contact information for the person on your team who handles energy for your city or town to energymma.org.

Municipal Real Estate Auctions
Close the file on tax title or municipally-owned properties! For over 45 years and 16,000 auctions, JJManning Auctioneers has helped cities & towns bring non-performing properties back on the tax roll. The city/town will win in four ways and JJManning will push the message: One time infusion of the sale dollars achieved; carrying costs are ended; properties go back on the tax roll; properties get developed versus sitting there as an eyesore. Recent real estate auctions for the towns of Scituate and Freetown have generated huge crowds and strong dollars for those towns. Call us today 800-521-0111 or visit [www.JJManning.com](http://www.JJManning.com).

New Manager Webinar Series
Designed for those with limited experience managing direct reports. Focused on core skills any manager should master to engage, develop and retain talent, and drive the team member performance. Town Counsel Services
KP | Law is a municipal law firm. With offices in Boston, Hyannis, Lenox, Northampton and Worcester, we serve as town counsel to more than 125 towns throughout Massachusetts, from Provincetown to Williamstown, and as special counsel to another 90. For more than 30 years, we have devoted ourselves to municipal law and have become experts in the defense of all areas of municipal trial matters. We have specialists in all areas of municipal law and maintain an environmental and land use law department that is on the cutting edge of planning, zoning and conservation. KP | Law is highly sensitive to the limited legal services budgets of Massachusetts communities and thus has highly competitive billing rates to give your town the best quality legal counsel in the most cost-efficient manner. There is never a need for special counsel. Our breadth and depth of experience helps keep our cost per opinion to a minimum and enables us to service our clients quickly and efficiently, and is consistent with our commitment to excellence. For additional information on the legal services that KP | Law provides, please visit [www.k-plaw.com](http://www.k-plaw.com) or contact Lauren Goldberg, Esq., at 617-556-0007, or toll-free at 800-548-3522, or at lgoldberg@k-plaw.com.

Town Counsel Services
Miyares and Harrington LLP provides Town and Special counsel services to help build and implement local programs that serve community needs. We have the expertise you require, based on decades of real-world experience. We take the time to understand your situation. We inquire, listen, and respond. We provide options that will work for you. We are committed to the values of democracy, to preservation and enhancement of natural resources and the built environment, and to excellence and care in support of municipal objectives. We offer competitive rates, personal service, diligent attention to our clients’ needs, and good humor. Please contact us at contact@miyares-harrington.com or 617-489-1600.

Tax Title Legal Services
KP | Law has been providing a full range of legal services to municipal treasurers and collectors for more than 30 years. Our experienced tax title attorneys draft collection letters and payment agreements; prepare all instruments relative to tax takings and tax sales; draft pleadings for Land Court foreclosures; and provide full representation of municipalities in Land Court actions. We also provide assistance with disposition or reuse of tax parcels. The breadth of our experience, volume, use of experienced paralegals, state-of-the-art computer and informational services, and close proximity to the Land Court enables us to provide prompt, cost-effective services. For additional information, please visit www.k-plaw.com or contact Lauren Goldberg, Esq. at 617-556-0007, or toll-free at 800-548-3522, or at lgoldberg@k-plaw.com.

Municipal Financial Management Software: Accounting, Cloud, Utility and Collections
VADAR Systems provides financial management software to more than 100 Massachusetts municipalities. Labor Counsel Services/Municipal Human Resources Specialists
Clifford and Kenny, LLP provides quality representation to cities, towns and school districts in the area of labor and employment. Attorneys John Clifford and Jaime Kenny have many years of experience in representing clients for collective bargaining and personnel-related matters including discipline and discharge of unionized employees. We have extensive experience in the area of police and fire injured-on-duty cases, and have worked extensively with municipalities and insurers to resolve costly long-term claims. We offer training in sexual harassment, social media and the “just cause analysis” to municipal managers. We also serve as appointed hearing officers on a case-by-case basis. Many of our clients take advantage of a flat monthly rate for unlimited phone calls and emails, which encourages key managers to work with counsel prior to making critical personnel decisions. Check our website at CliffordKennyLaw.com to see a complete list of our satisfied clients or call John Clifford or Jaime Kenny at 781-924-5796 for more information.

Municipal Financial Management Services
Eric A. Kinsherf, CPA, has been involved in municipal finance since 1994 in various capacities, ranging from Finance Director to an auditor of municipalities as a Certified Public Accountant. Cities and towns in need of a CPA specializing in municipal auditing and consulting are offered services such as municipal audits, assistance in year-end closing, interim treasurer, collector and town accountant services, revenue forecasting, and capital financing plan assistance. If you are in need of a municipal audit or a financial consultant, please contact Eric Kinsherf at eric@erickinsherfcpa.com or at 508-833-8508. Learn more at www.erickinsherfcpa.com.

Human Resources Consulting
Human Resources Services Inc. provides a full range of human resource management consulting services to Massachusetts’ local governments and other public agencies. Specialization includes compensation/classification, performance appraisal, job analysis and evaluation, job descriptions, salary/benefits and total compensation surveys and analytics, personnel policies/handbooks, staffing and organizational management studies, HR audits and assessments.
