Gov. Healey files FY24 state budget

By Jackie Lavender Bird

On March 1, Gov. Maura Healey filed her $55.5 billion state budget plan for fiscal 2024, which includes funding for local accounts that she announced last week.

Healey’s proposal, known as House 1, would increase the main discretionary local aid account by 2% over fiscal 2023, while increasing Chapter 70 school aid by $586 million, which would fund commitments made in the 2019 Student Opportunity Act. The governor also proposed increases for regional school transportation, vocational school transportation, special education reimbursements, payments-in-lieu-of-taxes (PILOT), transportation of students in temporary housing, library aid, and rural school aid.

- See Division of Local Services preliminary fiscal 2024 Cherry Sheet aid amounts for regional school districts
- See Division of Local Services preliminary fiscal 2024 Cherry Sheet aid amounts for individual cities and towns
- See Division of Local Services preliminary fiscal 2024 Cherry Sheet

“Local officials look forward to working with the Healey-Driscoll administration and the Legislature to build on this proposal to secure vital investments in our schools and essential municipal services, and continue a strong state-local partnership,” said MMA Executive Director and CEO Geoff Beckwith.

“In particular, the MMA will be seeking a higher increase for Unrestricted General Government Aid, higher minimum aid levels for Chapter 70 school aid, and a solution to spiking special education costs, among other key priorities,” he said.

House 1 would establish a new Education and Transportation Fund that would receive all revenues from a 4% surtax on incomes above $1 million that was approved by voters last November. The new revenue generated from the tax is to be dedicated to education and transportation.

House 1 would not tap into the state’s Stabilization Fund, which has grown to a record $6.94 billion and is projected to be at $8.96 billion by the close of fiscal 2024.

As companion legislation, the governor also filed a $859 million tax relief package.

Gov. Maura Healey addresses local officials during the MMA Annual Meeting on Jan. 20, when she said she would give municipal leaders a preview of local aid accounts before filing her first budget on March 1.

House OK’s budget bill with remote meeting extensions

By Ali DiMatteo

On March 1, the House passed a redrafted version of a $282 million supplemental 2023 budget bill filed by Gov. Maura Healey in January that includes a majority of her “immediate needs” bond bill, as well as extensions of pandemic-related authorizations related to public meetings and outdoor dining.

The House bill’s $585 million in bonding authorizations include $400 million for the MassWorks Infrastructure Program and $104 million for the Massachusetts Clean Water Trust.

The House included other MMA priorities — extensions to pandemic-related authorizations that were set to expire within the next month. The bill would:

- Permit remote and hybrid meeting options for public bodies through March 31, 2025
- Permit remote voting options for representative town meetings through March 31, 2025
- Permit reduced quorums for open town meetings through March 31, 2025
- Extend an expedited process for temporary permits for outdoor dining service and to-go cocktails through April 1, 2024

The House bill (H. 58) includes nearly $86 million to address the migrant housing crisis, a slight boost over Healey’s request. The funding would be used to expand shelter infrastructure and the provider workforce. It includes...
Executive Director’s Report

Budget-setting season kicks off on Beacon Hill

In contrast to the state, cities and towns are facing major fiscal challenges and very tight budgets. That’s because communities must live under Proposition 2½, which caps municipal revenues, and spiraling inflation, which has driven up expenses at double the allowable municipal revenue growth rate.

State tax revenues increased by 34% from fiscal 2020 to 2023, an average growth rate of 11.3% per year. During this time, municipal property taxes and local receipts experienced average growth of just 3.7% per year. This disparity is clearly a problem, as the state’s fiscal capacity has increased at triple the rate that communities have experienced. Inflation was 15.6% during this time, with an average rate over 5%.

This shows that the state’s fiscal capacity has grown much faster than inflation, and local fiscal capacity has been crushed by inflation, with communities in a weaker financial position through no fault of their own.

Because costs are outstripping local capacity, municipalities are more reliant than ever on increases in state aid in order to deliver vital municipal and education services, ensure safe streets and neighborhoods, and maintain local roads and critical infrastructure.

We all know that local services are fundamental to our state’s economic success and competitiveness, which means that adequate funding of local aid is directly linked to our state’s economic success and competitiveness.

The Healey-Driscoll administration kicked off the annual budget-setting season on Beacon Hill this week when they filed their first state budget proposal, known as House 1.

The process now moves to the Legislature, where lawmakers will start their months-long process of listening to constituents and stakeholders, diving into the details, making decisions based on their collective priorities, and delivering a final product to the governor by July.

Because of the stark fiscal realities facing cities and towns, we are asking our legislators to view the governor’s budget as a first step, not the final step, on local aid.

Many aspects of the administration’s budget proposal match up with challenges facing cities and towns, providing a better starting place than gubernatorial budgets filed in past years. Those previous budgets have typically offered increases for Chapter 70 school aid and Unrestricted General Government Aid, but have level-funded most other accounts, leaving it to the Legislature to increase funding for a wide range of state commitments.

DIRECTOR’S REPORT continued on 17
MMA to hold Legislative Breakfast Meetings in March

By Daniel Yi

Registration is now open for the MMA’s spring series of Legislative Breakfast Meetings, which will be held on March 17 and March 24.

Each year, the MMA hosts a series of meetings in communities across the Commonwealth to give local leaders, legislators and MMA staff the opportunity to network in an informal setting and learn about and discuss issues of importance at the local and state level.

The spring series of breakfasts will take place as legislative priorities begin to take shape for the new session, and as the Legislature begins to formulate its fiscal 2024 state budget plan.

Discussions will also be centered on the many bills that continue to be on the MMA’s radar for the new session, including a proposed municipal and public safety building authority, a permanent option for remote meetings, and more.

Other topics of interest will include the new administration’s immediate needs bond bill and Chapter 90 bond bill.

Municipal officials from every community are encouraged to take advantage of this opportunity to discuss issues of importance with MMA staff and legislators. Attendees are also urged to contact their local legislators and invite them to attend.

A light breakfast and coffee will be provided at 8:30 a.m. Introductions will begin shortly thereafter, followed by presentations and a Q&A session. The meetings will end by 10:30 a.m.

Meetings will be held on the following Fridays:
- March 17: Fairhaven and Tyngsborough
- March 24: Adams and Westfield

Location details will be available soon.
Meetings are free to attend. Members are asked to pre-register online.

For more information, visit www.mma.org or contact Daniel Yi at 617-426-7272, ext. 125, or dyi@mma.org.

Community One Stop for Growth accepting Expressions Of Interest

Community One Stop for Growth is accepting Expressions of Interest through March 17 from potential applicants prior to submitting a full application.

Submission of an Expression of Interest is a highly recommended but optional step in the process to compete for funding through the Community One Stop program.

Organizations may submit one EOI to seek input on a number of potential projects.

EOIs are reviewed by staff at all participating agencies, and feedback will be provided to help potential applicants strengthen prospective grant applications.

Details about the EOI process, including an EOI template, are available online.

Community One Stop, which was unveiled at the MMA Annual Meeting in January 2021, is a single application portal and collaborative review process to help cities and towns compete for state grant funding for housing and economic development programs. Communities can be considered by multiple grant programs simultaneously, have access to guidance and partnership from state agencies, and are able to receive referrals to additional funding opportunities.

Twelve programs will be administered through the fiscal 2024 application process:

- Executive Office of Housing and Economic Development
  - MassWorks Infrastructure Program
  - Urban Agenda Grant Program
- Department of Housing and Community Development
  - Housing Choice Grant Program
  - Massachusetts Downtown Initiative
  - Community Planning Grant Program
  - Rural and Small Town Development Fund
- MassDevelopment
  - Brownfields Redevelopment Fund
  - Site Readiness Program
  - Underutilized Properties Program
  - Collaborative Workspace Program
  - Real Estate Services Technical Assistance
  - Commonwealth Places Programs

The full application period for fiscal 2024 will open in May and close on June 2.
Housing Working Group files report with governor

By Ali DiMatteo

A special task force established to help determine the structure of a new housing secretariat and inform the process of filling the position has filed its report with Gov. Maura Healey.

Over the course of several meetings in February, the governor’s Housing Working Group “examined housing challenges and opportunities in Massachusetts, considered alternative federal and state responses to housing production, and explored programs and strategies that a new Housing Secretary could pursue to streamline, incentivize, and enhance the production of affordable, equitable, and sustainable housing across the Commonwealth,” the report states.

The report, filed on Feb. 19, outlines 11 recommendations for the new housing secretariat.

“To adequately address the housing crisis, the new Housing Secretary must work with Governor Healey and Lt. Gov. Driscoll to establish bold goals and set concrete plans to rapidly increase housing production and preservation efforts,” the report states. “Intentionality in addressing housing affordability, equity and sustainability will serve as the foundation of the Commonwealth’s future success.”

The 17-member task force, created by an executive order that Healey signed on Jan. 20, was chaired by Lt. Gov. Kim Driscoll and included Economic Development Secretary Yvonne Hao and Administration and Finance Secretary Matthew Gorzkowicz. Municipal representatives were Newton Mayor Ruthanne Fuller, Worcester City Manager Eric Batista, and Provincetown Town Manager Alex Morse. The group’s 11 other members included housing advocates, developers and housing finance organization leaders. Healey convened the group’s first meeting on Feb. 3.

The governor has said she expects to file legislation to create the new secretariat in March. At the Feb. 14 meeting of the Local Government Advisory Commission, Driscoll said a housing secretary isn’t likely to be appointed until this summer.

The Department of Housing and Community Development has not functioned as a separate entity since 1991, having been folded into other executive offices — transportation, environment and, most recently, economic development.

Healey has identified housing as one of her top priorities, saying she is concerned that high housing prices and low inventory will affect the long-term economic competitiveness of the state.

MassHousing offers Planning for Housing Production grants

MassHousing has opened the application period for the Planning for Housing Production Grant Program, which provides cities and towns with the technical capacity needed to implement local planning and transform priority development sites into new affordable homes.

MassHousing will fund pre-development activities on priority housing development sites by contracting directly with third-party consultants and then matching consultants with municipalities based on their respective expertise and local needs.

The program prioritizes the reuse and redevelopment of municipally owned properties. Exceptionally positioned privately-owned sites may also be eligible for funding.

Grant funds will support pre-development planning activities that create development-ready sites, including technical assistance with a municipally led RFP process. In all cases, technical assistance funding will prioritize the robust public engagement needed to build pro-housing constituencies.

More information and the application are available on the MassHousing website. Applications are accepted on a rolling basis.

Local Technical Assistance Program to host grant writing webinar

The Local Technical Assistance Program will host a free grant writing webinar on March 9 covering the basics of completing a grant or funding application and a method for approaching and completing applications.

Anticipated topics will include reviewing and understanding what an application requires, collection of the application’s information, readability of an application, and considerations for strengthening an application’s chances of being funded.

The Local Technical Assistance Program, with locations in all states and Puerto Rico, is a national network of local and rural road agencies that is facilitated by the Federal Highway Administration. The LTAP provides training, technical assistance, and technology transfer services to help local agencies manage and maintain their roadway systems.

Register for the webinar
Webinar offers strategies for facilitating meetings

By Lily Rancatore

Nearly 400 local officials attended an MMA webinar on Feb. 7 focused on effective public meeting facilitation.

Adams Select Board Vice Chair Christine Hoyt opened the session by reviewing steps for building a meeting agenda. She said it’s important to plan ahead and specify the time, input expected from content experts, and supporting materials or technology needed for a successful meeting.

Hoyt discussed a planning document that outlines the details of upcoming meetings and helps her stay organized. She also discussed standard protocols for timely follow-ups and establishing future agenda items.

Deerfield Select Board Chair Trevor McDaniel reviewed a public participation policy that his town adopted in February 2022. Under the policy, the Select Board devotes the first 20 minutes of each meeting to public comment. Allowing public comments at the beginning of each meeting, he said, permits the public to speak on agenda items before the board deliberates, which fosters respect among members and the public, promotes a successful and civil meeting, and maintains efficiency.

Easton Select Board Chair Dottie Fulginiti shared response strategies in cases where a meeting becomes emotionally charged. She recommends that board members individually review agenda items before each meeting and anticipate possible public reactions, as well as how to calmly respond.

Fulginiti stressed the importance of setting expectations, remaining in control, and redirecting comments in a positive way. She said it’s worth considering having a “side room” with appropriate town staff for working out issues that need personal attention, or calling a brief recess to reset the tone of the meeting if things become tense.

The webinar concluded with 20 minutes of questions and answers, moderated by Stow Town Administrator Denise Dembkoski. Panelists addressed questions about public comments, establishing a code of conduct, and navigating hybrid meetings.

MMA to host ‘Reframing Recruitment’ webinar series

On March 15, the MMA will launch “Reframing Recruitment,” a free monthly webinar series for appointed and elected municipal officials that will showcase timely hiring strategies that can set your community up for success.

Online registration is open for the first session of the series, “Setting the Table – Vacancies and Advertising,” which will cover how to attract a broad pool of candidates and remain competitive by embracing innovative strategies for advertising vacancies and writing standout ads. Panelists will discuss unique spaces to place ads to maximize the potential for reaching diverse candidates.

Upcoming webinars in the series will include:
- Reframing Recruitment: The Interview Process – April 19
- Reframing Recruitment: What Happens After the Offer – May 17
- Reframing Recruitment: Key Takeaways from Vacancy to Post-Recruitment – June 14

Jen Breaker, the assistant town manager and communications director in Danvers, and Caitlyn Julius, the assistant human resources director in Springfield, will lead each of the webinars. They will be joined each month by a special guest who has extensive experience in human resources and recruitment.

For more information, contact MMA Education and Training Coordinator Lily Rancatore at lrancatore@mma.org.

LGAC looks ahead to FY24 budget

During the Feb. 14 meeting of the Local Government Advisory Commission, Revere Mayor Brian Arrigo says municipalities will be unable to maintain local services at current levels if the Unrestricted General Government Aid account is increased by only 1.6% for fiscal 2024, matching the consensus forecast for state revenue growth. He adds that a 14% increase in out-of-district special education tuition costs for fiscal 2024 will put added strain on local budgets.
‘Nero’s Law’ training deadline extended by a year

By Dave Koffman

The Office of Emergency Medical Services in the Department of Public Health has extended the compliance deadline for emergency medical service providers to be trained in police dog treatment and transport.

Under Chapter 23 of the Acts of 2022 (known as “Nero’s Law”), ambulance services in Massachusetts must ensure that all certified EMTs, at all levels, complete a training course of at least three hours dealing with police dog (K9) treatment and transport.

In early February, the Office of Emergency Medical Services pushed the implementation deadline back by one year (with AR 2-270), giving ambulance services without waivers until Feb. 10, 2024, to comply. The OEMS also made changes to the refresher training, course instructor and resource requirements.

The MMA had joined the Professional Firefighters of Massachusetts, Massachusetts Ambulance Association, and the Fire Chiefs Association of Massachusetts in writing a letter to the Department of Public Health requesting additional time for review and a one-year extension for the thousands of EMS personnel in Massachusetts who must comply with the new training requirements.

Nero’s Law, named after a police dog, requires emergency medical personnel to assess, treat and transport police K9s that are injured in the line of duty. This may include first aid, CPR, and other lifesaving interventions. Emergency medical personnel would be advised not to transport injured K9s, however, if providing such transport would inhibit their ability to provide emergency medical attention or transport to a person requiring services.

Nero’s Law was filed in response to a line-of-duty shooting in 2018 that killed Yarmouth Police Sergeant Sean Gannon and severely injured his K9 partner, Nero. At that time, emergency medical personnel were not permitted to treat Nero’s critical injuries.

MSA to host Western and Rural Mass. Municipal Conference on April 1

The Massachusetts Select Board Association will host its third Western and Rural Massachusetts Municipal Conference on Saturday, April 1, in Holyoke.

The event will bring together regional stakeholders, including municipal officials, planning agencies and legislators, from Berkshire, Franklin, Hampden and Hampshire counties to address the challenges facing the region, with a specific focus on rural issues.

Conference goals are to promote sustainable cross-governmental partnerships across western Massachusetts, to share strategies for addressing challenges facing rural communities in the region, and to improve rural advocacy efforts.

The conference will open with a legislative panel with Rep. Natalie Blais and Sen. Joanne Comerford focused on rural priorities.

State Auditor Diana DiZoglio will lead a session covering her office’s priorities for rural communities, with an opportunity for attendees to provide input and feedback.

The conference will conclude with a discussion about the Chapter 90 program and local road conditions, as well as other rural priorities, with Sen. Paul Mark.

The conference will be held at the Delaney House, located at 3 Country Club Road in Holyoke. Registration and networking will begin at 8 a.m. The program will run from 8:30 a.m. to 12:30 p.m.

Boxed lunches will be available with the option to participate in a networking lunch or take lunch to go after the conference.

More information and a detailed agenda will be made available in the coming weeks.

The registration fee is $35. Registration is available at www.mma.org.

Contact: MMA Senior Member Services Coordinator Isabelle Jenkins at ijenkins@mma.org

Municipalities must respond by April 18 for additional opioid funds

In late 2022, the Attorney General’s Office announced proposed opioid settlements with Teva, Allergan, Walgreens, Walmart and CVS, which will bring additional funds for prevention, harm reduction, treatment and recovery across Massachusetts.

On Feb. 9, the National Opioid Settlement implementation administrator, Rubris, emailed a package of information and materials to municipalities that they must complete for each of the settlements by April 18 to receive abatement funds from these settlements. A municipality must fill out these forms even if it has already agreed to participate in settlements with Johnson & Johnson and Cardinal, AmerisourceBergen and McKesson.

Additional information about the settlements is available on the AG’s website, including estimated settlement payments to participating municipalities and answers to frequently asked questions. Additional questions may be emailed to the Attorney General’s Office at MAOpioidSettlements@mass.gov.
MMA webinar highlights the benefits of engagement

By Lily Rancatore

The MMA co-hosted a webinar with Health Resources in Action on Feb. 21 to review best practices for engaging residents in municipal decision-making processes.

Ben Wood, senior director of policy and practice for Health Resources in Action, began by reviewing the "spectrum of engagement" and describing community involvement, impact, trust and communication along a continuum. Ideally, Wood explained, resident engagement begins with outreach and evolves to a strong bidirectional relationship where municipal decisions are made at the community level and strong partnerships are formed.

When approaching resident engagement, municipalities are advised to consider how to promote transparency in their efforts, sustain authentic and diverse engagement, and strengthen municipal capacity to correct power imbalances.

Wood reviewed actions municipalities have taken to build trust and address power discrepancies across the Commonwealth, highlighting the creation of interactive dashboards and allocation of funds for community-led decisions.

Cynthia Espinosa Marrero, senior manager of health and racial equity at Health Resources in Action, facilitated a discussion with panelists to showcase successful community engagement initiatives in Chelsea and Worcester.

Gina Plata-Nino and Casey Burns, members of the Worcester Together Coalition, and Lourdes Alvarez, Chelsea’s communication and community outreach manager, discussed creative ways that local officials can use to engage residents who have been historically excluded from municipal decision-making processes. Panelists emphasized the importance of governing with intention, building trust for long-term relationships, and prioritizing engagement, rather than making it a “check-the-box” item.

Marrero facilitated a question and answer session, which included questions about tools for broadly reaching constituents, the importance of engaging persons with disabilities, and methods for compensating residents for participating in community-sponsored activities.

Wood closed the session by reviewing key takeaways for investing in community engagement and kickstarting outreach.

MMA Board approves policy committees for 2023

By Daniel Yi

At its Feb. 14 meeting, the MMA Board of Directors approved the rosters for the MMA’s five policy committees for 2023.

More than 110 local officials from communities across Massachusetts serve on the MMA policy committees, which advise the MMA Board of Directors, staff and MMA members on legislative, regulatory and public policy issues.

The committees also draft resolutions for the MMA’s Annual Business Meeting, municipal Best Practices series, and the MMA’s legislative package (biennially).

Policy committees hold a regular schedule of meetings, usually one per month. Each committee is assigned an MMA staff member to assist with its research, consideration of issues, and administrative functions.

Each committee has 23 members, composed of mayors, select board members, councillors, city and town managers/administrators, and finance committee members, plus five "presidential appointees" and five technical appointees. Presidential and technical appointees serve one-year terms, while the other members serve three-year terms.

The following are the chairs of each committee:

**Energy and the Environment:** Michael Ossing, councillor, Marlborough

**Fiscal Policy:** John Coderre, town administrator, Northborough

**Municipal and Regional Administration:** Linda Tyer, mayor, Pittsfield

**Personnel and Labor Relations:** Anthony Mazzucco, general manager, Norwood

**Public Works, Transportation and Public Utilities:** James Lovejoy, Select Board member, Mount Washington

The full committee rosters and descriptions are posted on the MMA website.
EPA opens public comment on potable water permit

On Feb. 21, the U.S. Environmental Protection Agency Region 1 released a draft renewal of the region’s National Pollutant Discharge Elimination System Potable Water Facilities General Permit.

A Potable Water Facilities General Permit authorizes the discharge of a specified amount of pollutants into U.S. waters. Multiple facilities in a given region with similar operations are issued a general permit that sets uniform requirements to cover these facilities. These permits expire after five years and are then reissued through a public process. A copy of the Draft General Permit, related documents, and an informational webinar are available on the EPA’s website.

A copy of the Draft General Permit, related documents, and an informational webinar are available on the EPA’s website.

Public comments will be accepted for 60 days and must be submitted via email to Chien.Nathan@epa.gov by April 21.

- Additional information about the draft permit
- List of affected municipalities

MassRecycle Conference and Trade Show is March 23

The MassRecycle Conference and Trade Show will be held on March 23 in Marlborough. The conference provides a platform for education on the latest solid waste and recycling challenges, highlights potential solutions and best practices, and creates unique networking and job development opportunities.

This year’s programming will feature content relevant to mayors, town managers, sustainability coordinators, solid waste and recycling coordinators, environmental consultants, and more.

Conference panel topics include shifting the narrative on recycling, planning for success, and learning from established extended producer responsibility systems. The conference is hosted by MassRecycle, a statewide nonprofit coalition of individuals, municipalities, the waste industry, and other organizations dedicated to improving recycling, organics diversion, and sustainable materials management in Massachusetts.

The conference will be held at the Best Western Royal Plaza Hotel, and programming will run from 8 a.m. to 6 p.m. Visit the conference website for more details and registration.

MMA to host social media best practices webinar on March 7

The MMA will host a free webinar on March 7 about how to use social media as a tool to communicate and engage with communities while complying with the unique requirements imposed on municipal officials.

Panelists will explore best practices surrounding the broad legal considerations of social media for governing bodies, as well as internal and external policy development.

Speakers will include:
- Attorney Ann Marie Noonan of Valerio, Dominello & Hillman, LLC
- Brianna Sunryd, director of communications and civic innovation, Amherst
- Sean Dugan, director of communications and special projects, Lexington

Appointed and elected municipal officials may register online. For more information, contact MMA Education and Training Coordinator Lily Rancatore at lrancatore@mma.org.

Lt. Gov. Driscoll discusses housing

Lt. Gov. Kim Driscoll discusses housing and infrastructure needs while presiding over her first Local Government Advisory Commission meeting on Feb. 14. She discussed the administration’s plans to create a new housing secretariat to address state housing needs and to keep Massachusetts competitive. “We’re really excited about having a housing secretary who can focus exclusively on housing,” she said.
FTA accepting applications for bus grants

By Adrienne Núñez

The Federal Transit Administration is accepting project proposals and grant applications through April 13 for the Low or No Emission (Low-No) and Buses and Bus Facilities grant programs.

The Bipartisan Infrastructure Law makes $1.2 billion available through the Low-No Program and $469 million for Buses and Bus Facilities.

The Low-No Program is intended to support state and local governments in transitioning fleets to low-pollution and energy-efficient vehicles. Funding is provided to state and local government entities for the purchase or lease of zero- or low-emission transit buses, including acquisition, construction, and leasing of required supporting facilities. Municipalities, tribal governments, states, counties, local government authorities, and designated recipients are eligible to apply.

The Buses and Bus Facilities Program helps with the financing of buses and bus facility capital projects. This includes replacement, rehabilitation and purchase or lease of buses, related equipment and facilities, as well as construction of new bus-related facilities. States or local government entities operating fixed-route bus service, tribal governments, and designated recipients that allocate funds to fixed-route bus operators are eligible to apply.

Recipients may use up to 0.5% of their requested grant award for eligible workforce development and an additional 0.5% for costs associated with training at the National Transit Institute. Projects related to zero-emission vehicles are required to spend 5% of requested funding for workforce development.

Both grant programs are included in one notice of funding opportunity, but a separate application package is required for each program. Applicants may apply for one or both grants through Grants.gov and must include supplemental form SF-424 with their submission.

Click here for a grants summary with links to the notice of funding opportunity.

MMA to host webinar on dealing with conflict March 28

A free MMA webinar on March 28 will highlight strategies for effective conflict management.

Conflict among appointed and elected officials may create a negative environment, hinder communication and collaboration, and impact goals and objectives. Municipal officials have the ability, however, to approach conflict positively and elicit favorable outcomes.

This webinar will cover how to skillfully manage conflict, neutralize its negative effects, and maintain a positive and healthy work culture.

Representatives from AllOne Health will review best practices for managing conflict in the municipal workplace, and within volunteer committees, boards and councils, with a focus on effective communication and continued development of interpersonal skills.

AllOne Health Executive Director Michael Stuart has more than 30 years of experience working in behavioral health care in Massachusetts and serves as the account manager for MIIA, working closely with municipalities to provide impactful assistance services. Katie Gilfeather, an EAP professional and clinician, has worked in the behavioral health care field for 40 years, developing various EAP programs for towns and cities throughout Massachusetts and demonstrating expertise and proficiency in this area.

Registration is available online.

For more information, contact MMA Education and Training Coordinator Lily Rancatore at lrancatore@mma.org.

With energy costs in flux, it might be time to look at pricing options

As we near the end of the fourth warmest winter on record, energy costs are in a state of flux. Geopolitical events, warm weather, energy storage, and energy policies at the state and federal level all play into day-to-day volatility in the energy marketplace.

Constellation, the MMA’s partner in the MunEnergy program for more than 20 years, offered a webinar on this topic in January.

With a mild winter so far, this might be a good time to start looking at pricing options, rather than waiting until spring.

Constellation is available to help cities and towns manage the complicated energy market. They are the MMA’s trusted partner because they understand the municipal energy marketplace.

For more information on the MunEnergy program, visit the MMA website or contact Katie McCue at 617-426-7272, ext. 111 or kmccue@mma.org.
MMHR to discuss de-escalation techniques on March 9

The Massachusetts Municipal Human Resources association’s first program meeting of the year will cover de-escalation strategies and managing employee conflicts. The free webinar will be held on March 9.

Jean Haertl, president and founder of Safety and Respect at Work, LLC, will lead a training session on de-escalation techniques covering the skills needed to diffuse tense situations in the workplace.

Michael Stuart and Katie Gilfeather from AllOne Health will then discuss how HR directors and supervisors can effectively manage conflicts with and between employees. The session will include a discussion about how HR professionals can best take care of themselves when dealing with difficult situations.

Select Board Association to discuss affordable housing trusts

The Massachusetts Select Board Association’s first program meeting of the year will be a free webinar covering best practices for affordable housing trusts on March 17.

The webinar will provide an overview of affordable housing trusts and examine best practices for communities using a trust, including an overview of some of the tools available to municipalities through the Massachusetts Housing Partnership.

The webinar will also review the process for establishing an affordable housing trust and will discuss examples of successful affordable housing trust projects.

Featured speakers will include:
• Shelly Goehring, senior program manager at the Massachusetts Housing Partnership
• Kathryn Roy, chair of the Lexington Affordable Housing Trust Study Committee and vice president of Charlesbank Homes Foundation

The session will be moderated by MSA Chair and Williamstown Select Board Member Andy Hogeland.

The free webinar will run from noon to 1 p.m., and advance registration is required. An email with the registration link was sent to all select board members in February.

Contact: MMA Senior Member Services Coordinator Isabelle Jenkins at ijenkins@mma.org

Citizen Planner Training Collaborative annual conference is March 18

The Citizen Planner Training Collaborative will hold its annual conference on March 18 in Worcester.

The conference will feature 17 land use planning-related workshops held over three sessions throughout the morning to midafternoon. Workshop topics include zoning pitfalls, multi-family zoning requirements for MBTA communities, the Community One Stop for Growth program, Chapter 40B, and small-scale affordable housing.

Seven of the 17 workshops are eligible for MIIA Rewards credits. (See the conference website for details.)

The conference will be held at the College of the Holy Cross, opening at 8 a.m. The final session of workshops will end at 3:15 p.m.

The cost to attend is $95, and advance registration is required. The event will include a continental breakfast and a buffet lunch.

For more information and to register, visit the CPTC’s conference page.

Let us know about your local news

Every day across the Commonwealth, municipal leaders are figuring out ways to deliver services more efficiently, save taxpayers money, engage more citizens in the vital work of local government, and improve the effectiveness of the layer of government that has the most direct impact on people’s lives. The MMA wants to recognize and help spread the word about these local creative solutions.

If your community has launched a new program or initiative, or has found a unique solution to a common problem, please let us know by filling out our new Local News Tips form on the MMA website.
AG Campbell to speak at WEMO symposium on April 28

Attorney General Andrea Campbell will give the keynote address at the Women Elected Municipal Officials spring symposium on Friday, April 28.

The free, virtual symposium will run from 9:30 to 11:30 a.m. The theme is “advancing women’s leadership in policy making.”

The keynote will be followed by a series of breakout discussions.

ATFC to hold spring conference on April 29

The Association of Town Finance Committees will hold its spring conference on Saturday, April 29, at the Pompositticut Community Center in Stow.

The agenda will feature “The ABC’s of Grants,” an overview of federal and state grants available to municipalities and the application process. A practitioner’s panel will address how a finance committee is affected when a town pursues and receives grant funding. Topics will include budgeting costs associated with grants, factoring funding into long-range planning, and other lessons learned. Attendees will also learn about resources to assist towns with the grant process.

The meeting will kick off with a legislative and budget update from the MMA. The conference will run from 9 a.m. to 1 p.m., with lunch served at noon.

The cost is $25 for ATFC members and $35 for all other registrants.

Contact: MMA Senior Member Services Coordinator Denise Baker at dbaker@mma.org

NLC holding Congressional City Conference March 26-28

The National League of Cities will hold its annual Congressional City Conference on March 26-28, in Washington, DC.

At the conference, local leaders can meet with influential federal decisionmakers, learn about critical new programs, and discover tools to further support and protect their communities. Attendees can also work with the NLC and their peers from around the country to ensure that their local priorities factor into the national conversation.

The NLC will also host pre-conference activities on March 24 and 25, and will hold “Hill Day” on March 28. Hill Day is an opportunity for elected officials, city staff and state municipal league staff to meet with their U.S. senators and representatives for briefings on key legislation and federal funding programs affecting their communities.

TransitMatters publishes toolkit to promote ‘Mobility Hubs’

TransitMatters has published a new toolkit to help municipalities, nonprofits and other community leaders bring Mobility Hubs into their neighborhoods.

Mobility Hubs are places that connect different modes of transportation and make transfers between them easy and convenient. Whether someone is walking or taking public transit to their final destination, Mobility Hubs offer infrastructure that is accessible and user-friendly, improving the transit experience with elements such as bus shelters and information displays.

Mobility Hubs are designed to improve the functionality of a transit system by empowering people with information and connections to move around freely.

The free Mobility Hubs Toolkit was created by TransitMatters’s strong volunteer network. It’s designed to be educational and engaging, using accessible writing, broad coverage, and technical basics and considerations.

Mobility Hubs documents often target planners and technical experts, but TransitMatter chose a “ground-up” approach “because some of the best street interventions are bottom-up, community-informed ones.”

The toolkit describes each element of a Mobility Hub, what it does, the benefits it brings, and anything that needs to be considered, such as costs, jurisdiction and equity considerations. The kit also highlights the benefits of Mobility Hubs through various characters’ experiences with new hubs in their neighborhoods.

The toolkit details how to advocate for Mobility Hubs in any neighborhood. TransitMatters is a Massachusetts-based organization, but it uses worldwide examples in the toolkit.

MMA-Suffolk to hold information sessions

By Katie McCue

The MMA and Suffolk University will hold information sessions on March 8 and 16 for upcoming Certificate in Local Government Leadership and Management programs.

The two sessions, to be held via Zoom at 10 a.m. on March 8 and 2 p.m. on March 16, will cover the same information. To register, visit www.mma.org/events.

In September 2023, the MMA and Suffolk University will launch the 21st and 22nd certificate programs in-person in Barnstable and Danvers. The program is held over the course of 25 Fridays from September through May.

The graduate-level academic program provides a solid grounding in municipal management, and covers topics such as human resources management, budgeting and financial management, and strategic leadership.

The program application is available on the MMA website. The application deadline is April 30.

Fellowship Program

The application deadline is May 1 for the MMA and Suffolk University’s Municipal Fellowship Program, which offers significant support to municipal managers and professionals to attend the master’s in public administration program at Suffolk’s Sawyer School of Business.

The fellowship program will provide a scholarship of up to $28,000 while the recipient’s municipality commits to continuing their salary and position while they attend the program part-time. The application is available on the MMA-Suffolk programs web page.

Applicants must already be accepted for admission to the MPA program and have the support of the chief municipal official in their municipality. Consideration will be given to graduates of the MMA-Suffolk Certificate in Local Government Leadership and Management program.

Finance Seminar

The MMA-Suffolk Municipal Finance Management Seminar will hold three programs in 2023.

The five-week program, held on Fridays, is designed to provide a deep dive into municipal finance.

The application period for the spring 2023 session has closed, but the application period for the fall 2023 session remains open through July 31. The application is available on the MMA website.

For more information on any of the MMA-Suffolk programs, visit mma.org/suffolk or contact Katie McCue at 617-426-7272, ext. 111, or kmccue@mma.org, or Kate Evarts at 617-426-7272, ext. 172, or kevarts@mma.org.

Meeting space wanted

Does your municipality have a public meeting space that would be appropriate for an MMA event?

With more than 60 meetings each year, the MMA uses several different types of function spaces around the state. The use of municipally owned meeting rooms greatly improves the organization’s ability to sponsor affordable educational events in a variety of places.

To offer your town or city’s municipal function space, contact Timmery Kuck, the MMA’s conference and meeting planner, at tkuck@mma.org.
USDA looks to boost farmland eligible for preservation

The U.S. Department of Agriculture’s Natural Resources Conservation Service in Massachusetts and the American Farmland Trust are working with municipalities to increase the amount of farmland eligible for federal preservation funding.

Under its Agricultural Land Easement program, the NRCS works with partners such as the Massachusetts Department of Agricultural Resources, land trusts, and municipalities to preserve farmland by paying willing farmland owners the development value in exchange for ensuring agricultural land remains protected and available for farming.

Eligibility for NRCS funding is based in part on soil types. A parcel must consist of at least 50% important farmland soils (Prime Farmland, Unique Farmland, or Farmland of Statewide Importance) as depicted in the NRCS soil survey.

These soil survey designations do not capture all areas suited for crop production, however. Designating additional soil types as Farmland of Local Importance can increase the potential for federally funded farmland preservation.

Under the Code of Federal Regulations, a municipality can designate soils as Farmland of Local Importance by following this process:

1. The NRCS reviews the soil mapping and land use in the municipality via the soil survey maps and aerial imagery.
2. Soil types with evidence of crop production that are not classed as Prime Farmland, Unique Farmland or Farmland of Statewide Importance in the soil survey are presented to the municipality to be designated as Farmland of Local Importance.
3. A municipal official and the NRCS State Conservationist sign the list. The municipal official can be anyone duly recognized as representing the town regarding agriculture, open space, small business or conservation, such as the conservation commission chair, agricultural commission chair, select board chair, mayor, town administrator, open space and recreation plan committee chair, planning board chair, etc.
4. The list is housed on the NRCS Field Office Technical Guide, where it will be applied to determine eligibility for federal farmland preservation funding.

As of January 2023, 39 Massachusetts cities and towns have designated Farmland of Local Importance.

Key points

- There is no cost to the municipality in designating Farmland of Local Importance; the NRCS funds this initiative to ensure that all land that is eligible for ALE funding is recognized.
- There is no regulatory association with listing soils as Farmland of Local Importance.
- Inventories of important farmland soils do not constitute a designation of any land area to a specific land use.
- The designation of Farmland of Local Importance does not affect property tax rates. The establishment of a farmland conservation restriction does not affect the tax rate for parcels under Chapter 61A.

The designation may not make a difference in preserving farmland. There are many factors in addition to soils, starting with landowner choice. Recognizing Farmland of Local Importance only addresses the 50% important soils ALE funding eligibility requirement.

For more information, contact Al Averill, certified professional soil scientist with the NRCS and American Farmland Trust, at albert.averill@usda.gov or 413-253-4356.

LGAC discusses regional schools, PILOT funding

During the Feb. 14 meeting of the Local Government Advisory Commission, Williamstown Select Board Member Andrew Hogeland asks the administration to fully fund regional school transportation and rural school aid for fiscal 2024, recognizing that rural districts face higher transportation costs per student. He also highlighted the importance of funding for the Payments in Lieu of Taxes (PILOT) program, especially for rural communities.

Clark, state lawmakers target waste

Congresswoman Katherine Clark praises the state’s waste-reduction efforts in her keynote address during a public policy forum hosted by the Legislature’s Zero Waste Caucus on Feb. 16 in Lexington.

Clark said Massachusetts is “securing a future that honors every person’s right to clean air, clean water and clean communities.” The event was titled “Waste Not, Want Not.”
Deerfield

Town produces, wins award for soil health study

As a part of its ongoing climate resiliency efforts, Deerfield received a $40,951 Municipal Vulnerability Preparedness Action Grant to study and engage the public in the protection and management of soils to store water in flood events, filter water, release water in times of drought, and sequester carbon.

The town’s Healthy Soils Report received a Sustainability Award this past December from the Massachusetts branch of the American Planning Association.

Following the award of the MVP grant in 2021, the town began working with Regenerative Design Group and Conservation Works on a study to determine a baseline of current soil health as well as the effects that land cover and current management practices have on the soil.

The town, which has a 2030 Climate Resiliency Plan in place, is located along the Connecticut River and Deerfield River valleys and is prone to flooding.

“The MVP program has been really great to us as a community,” said Select Board Member Carolyn Shores Ness. “We’ve had huge damages in the past, not just from [Hurricane] Irene, but also from other terrible storms. ... Being climate resilient is critical for the town based on where we are located.”

According to the report, healthy soil provides a number of useful functions related to climate resiliency, including carbon capture and storage, water filtration and storage, and nutrient storage, on top of its productive capacity and biological activity and diversity. Soil health is largely dependent on how people manage and use it.

The study identified the different soil types found across the town, along with the capacity for carbon sequestration.

“We know that good soil health in the community is related to having deeply rooted plants that withstand heavy rain and drought events better, and improve water storage, drainage and capacity,” Shores Ness said.

The study undertook extensive outreach and education efforts with town farmers, students and staff at Frontier Regional High School and Deerfield Academy, as well as the general public. Students at Frontier were engaged in field day activities for hands-on learning with study staff.

Shores Ness said that the town is now primarily focused on educational outreach about the science and results of the study as the town looks to implement strategies to improve soil health. Part of the goal is to empower residents to make changes within their own yards, while also looking to make changes in municipal practices.

The town is looking at tree preservation, as well as how lawn areas are managed by the Department of Public Works. The study identified the best trees for the town to plant in the public tree belt and promote for residential use, based on adaptability and resiliency.

“It is important to have municipal areas that are currently mowed lawn switched over to native meadows where possible,” Shores Ness said. “It helps to lower operational costs but is also a climate benefit supporting soil health and pollinator and wildlife habitats.”

The town has also developed a Yard-by-Yard program as a part of their 2030 plan that has been further supported by the results of the study. The program supports residential lawn-to-meadow conversions and native planting projects, as well as outreach and training.

“We are trying to come up with ways that people feel they have power and ability to impact climate change,” said Shores Ness, who also chairs the Board of Health.

The report identifies five actions the town and its residents can take to improve the health of their soils to positively support their climate change goals, and suggests new and updated bylaws to help build on the work that has already been done by the Planning Board. Shores Ness said two commercial entities are voluntarily working with the town to test out some of the suggested best practices to determine the impact on economic development.

“We are starting with the simplistic and will get more complex as we go on,” Shores Ness said. “With outreach and then implementation, it is a slow process but we are working toward these great ideas in the next year or two.”

Newton

Devices help Fire Department safely respond to EV crashes

With electric vehicles becoming more popular, the Newton Fire Department has become the second in the nation to secure devices that can immobilize electric vehicles involved in accidents.

Following New York City, Newton has unveiled devices that put electric vehicles “to sleep,” so they can’t move suddenly after an accident and injure emergency responders, passengers or bystanders. Newton has bought five of the devices, as fire departments increasingly confront safety challenges involving electric vehicles.

“Electric vehicles are such a new topic, and everyone is comparing notes and trying to figure out what’s the best practice,” said Newton Fire Capt. Phillip McCully, who leads the department’s safety training efforts. “It’s exciting..."
that Newton gets to be in the forefront of this, and we try to share the lessons we’ve learned, and take the lessons that other people have learned, to try to craft a really concrete and safe electric-vehicle response.”

Electric engines pose specific challenges because they operate more quietly than gas- and diesel-powered engines, and people can have trouble figuring out if an electric vehicle is still running — a problem potentially made more complicated by accident-damaged equipment.

McCully began his research after a viral video in July showed an SUV suddenly moving and rolling over onto a New York City firefighter after it had crashed. McCully discovered that a couple firefighters in Amsterdam had invented a hand-held device called Emergency Plug that prevents electric vehicles from moving after an accident. He befriended one of the firefighters, and got the devices shipped to Newton. The devices, which cost about $850 to $875 each, arrived just after the holidays and have been placed on different vehicles to ensure coverage throughout Newton.

The yellow device, which also works on hybrid plug-ins, has three adapters to accommodate various car brands. The device plugs into the same port as the charger and instructs the car to shift into neutral or park, depending on the make or model, McCully said. The devices restrict only vehicle movement, not hazards posed by electric-vehicle fires, he said.

According to McCully, the devices are popular with responders in Europe, Asia and the Middle East, but have been slower to catch on here. In general, U.S. responders have only begun grappling with the challenges involving electric vehicles. To help bridge this gap, the National Fire Protection Association has been offering online resources and training for first responders.

“While firefighters have had more than 100 years to learn how to handle incidents with internal combustion engine (ICE) vehicles, they’ve had very little time to understand and train for those involving EV and hybrid vehicles,” said Andrew Klock, the NFPA’s emerging issues lead manager, in a statement last year about training.

More than 180 Newton Fire employees have now been trained on the devices, and McCully said his department recently started analyzing Newton’s accident data to track the percentage of accidents involving electric vehicles.

Since Newton firefighters started posting online about their devices, firefighters from as far away as Hawaii, and as nearby as Concord, have asked about them, McCully said. The department invited firefighters from local departments to attend its trainings, he said, and Newton would willingly deploy the devices to accidents in neighboring communities.

– Jennifer Kavanaugh

Form-of-government resources available

The Massachusetts Municipal Management Association offers free resources to help communities that are considering a change in their form of government.

The Management Association, a member group of the MMA comprising town managers, administrators and assistants, has compiled answers to frequently asked questions as well as descriptions of the different forms of government with a professional administrator.

Also available are reports on towns that have gone through changes in their forms of government.

A management chart shows the progression of management authority in a decentralized vs. centralized form of government.

These and other related resources can be found in the MMA website Resource Library.

Members of the Massachusetts Municipal Management Association are also available to meet with charter commissions, government study committees and select boards to discuss options and answer questions.

Contact: MMA Senior Member Services Coordinator Denise Baker

Mayors discuss legal issues

Lauren Goldberg, a managing attorney at KP Law, discusses pressing legal issues affecting municipalities during the Feb. 22 online meeting of the Massachusetts Mayors’ Association. Goldberg addressed municipal flag-flying policies and “First Amendment audits,” in which self-appointed “auditors” record their interactions with public officials and post videos online.
Municipalities emerge from pandemic challenges in stronger position

By Jennifer Ranz

Despite facing a range of new challenges over the past three years of the COVID pandemic, MIIA Executive Vice President Stanley Corcoran said MIIA members “have seized new opportunities to come out stronger and better equipped for the future.”

Addressing MIIA’s Annual Business Meeting on Jan. 21 in Boston, Corcoran outlined a number of ways that local public entities around the state have boosted safety preparedness and financial strength during tough times.

Municipalities have encountered a wave of obstacles, from inflation and rising energy costs to labor shortages, supply chain disruptions and weather-related events.

“To a greater or lesser extent, we’ve all been affected in some way by the pandemic,” Corcoran said. “The theme of our 2022 annual report is Expanding Possibilities, which speaks to much of what we’ve collectively been doing to rebuild and find new ways of working while expanding our services.”

Corcoran highlighted three local entities that have expanded possibilities through innovative programs:

- The Franklin County Solid Waste Management District anticipated challenges that its 21 member towns would face with new Occupational Safety and Health Administration safety regulations on the horizon, but found there was no guidebook available that was specific to transfer stations. The district worked with MIIA to acquire necessary materials, develop a 200-page guide, and implement training for transfer station employees.

- After soliciting feedback from other municipalities and looking closely at rising renewal costs, the town of Danvers decided to return to MIIA’s Health Benefits Trust. MIIA worked closely with the town to develop a rollout plan, engage with union members to identify specific plan features that they needed, and complete a smooth transition.

- The town of Plymouth, an inaugural member of MIIA’s new Unemployment Services Program, has taken advantage of the program’s expanded human resources and operations support to help reduce local spending. The town estimates that the program has already saved thousands of taxpayer dollars, while further boosting town risk reduction.

Corcoran also commended municipalities that have implemented new technologies to address both rising and long-standing challenges. For example, towns are accessing federal and state resources to help prevent cyber breaches and mitigate their potential damages. Some municipalities have secured new boiler sensor technology to help prevent property losses from winter weather-related pipe breaks.

MIIA members also made great strides last year in designing and implementing training programs that further reduce risk exposure, Corcoran said. In 2022, more than 50 member municipalities completed OSHA Health and Safety Fundamentals certification training. Many members also accessed training courses that support police reform efforts, including seminars focused on legal updates, mental health intervention, de-escalation, and bias-free policing.

MIIA plans to launch a member portal for accessing account history and

Tips for addressing unemployment insurance fraud

After spiking at the beginning of the COVID pandemic and eventually leveling off, fraudulent unemployment claims are on the rise again.

Over the last three years, more than $60 billion has been paid out in fraudulent claims across the country, according to a recent report from the U.S. Government Accountability Office, including about $1.9 billion in Massachusetts alone.

Fraud is often committed by criminal organizations using stolen personal information acquired over the course of decades, and municipalities have been especially targeted.

The Unemployment Tax Management Corporation, one of MIIA’s Unemployment Services Program partners, estimates that a single claim can end up costing a municipality more than $30,000.

The UTMC recommends taking the following steps when fraud is suspected:

1. Verify with the employee that he or she has not filed a claim in the past year.

2. Respond to the request for information from the Massachusetts Department of Unemployment Assistance and indicate that the claim appears to be fraudulent — and that the employee has confirmed he or she did not file.

3. Instruct the employee to file a fraud report using the form on mass.gov.

4. Review monthly reimbursable bills or charge statements and file a protest for any charges related to the fraudulent claim.

MIIA’s new Unemployment Services Program provides unemployment risk management and training, claims management, streamlined payment processing, and full-service administration for its members. For more information, visit www.emiia.org/unemployment-services or call 800-526-6442.

---

MIIA continued on 21
The House bill includes Healey’s request—due to shelter placement.

$41 million focused on communities in temporary housing, library aid, and rural school aid.

This is a solid start. While further increases are still needed to get school transportation reimbursements, PILOT, and rural school aid up to full funding levels, and special attention must be given to addressing an unaffordable spike in special education costs, the gap between House 1 and full funding is smaller than in past years. Local officials look forward to diving into the details with members of the House and Senate, and building on this progress, with the goal of reaching full funding.

At the outset, there are two headline issues that require special attention, in addition to the special education, school transportation, PILOT and rural aid programs noted above. These are Unrestricted General Government Aid and Chapter 70 school aid.

A 2% UGGA increase is too low
For the past eight years, funding for discretionary local aid (UGGA) has followed a revenue sharing compact that increases aid each year by the same rate of growth as state revenues, providing predictable increases in unrestricted municipal aid, with a framework that is affordable for the Commonwealth because it uses a growth index that matches the state’s revenue capacity. During the past three fiscal years, however, while the state has benefitted from record tax revenue collections, the method of calculating state revenue growth underestimated the increases the state has enjoyed, creating a challenging process for cities and towns because UGGA increases were lower than the actual revenue growth rate. This was a major reason why the Legislature doubled the UGGA increase from 2.7% to 5.4% in its fiscal 2023 budget, a step that local leaders and the MMA applaud and deeply appreciate.

To avoid this problem in the fiscal 2024 budget cycle, the MMA strongly requests that the $1.23 billion UGGA account be increased using a stable measure of state revenue growth. Using a rolling three-year average of state revenue growth would anchor the framework with real data, would even out large swings, and would avoid the flaws that have kept revenue sharing increases below the actual growth in the state’s fiscal capacity.

Instead of the below-inflation 2% increase proposed in House 1, which would provide only $24.6 million more for fiscal 2024, UGGA funding should be based on a more accurate calculation of the recent growth in state revenues. This would generate a 6% increase, or $75 million, allowing cities and towns to keep pace with inflation. This would approximate the increase that the Legislature initiated last year and move communities forward with UGGA funding that is much closer to the actual need.

Chapter 70 funding must provide all districts with enough funding
Regarding Chapter 70 school aid, the MMA strongly supports full funding of the Student Opportunity Act, which is included in House 1. At the same time, communities and districts should all receive an adequate level of minimum aid to ensure that all schools receive a meaningful Chapter 70 increase in fiscal 2024, which should be at least $100 per student.

Under the school funding distribution in House 1, 119 communities and school districts, serving 257,000 students, would be relegated to increases of just $30 per student. Their education aid would increase by 0.7%, forcing these districts to impose painful cuts. Increasing minimum aid to $100 per student, would allocate an additional $18.8 million to provide some assistance to partially cover inflation.

Again, we know that lawmakers understand this issue, and we applaud the Legislature’s initiative to double minimum aid in this year’s budget. Local officials look forward to engaging with their representatives and senators to address this critical issue impacting so many communities and schools. Going forward, $100 per student would result in an average increase much closer to historical inflation.

Another aspect of Chapter 70 that calls for attention is the very high increase in mandated local contributions to the foundation budget formula. House 1 is based on a calculation that calls for a $400 million increase in required municipal spending on the school budget, a 5.6% increase. This is far above the growth in municipal revenues. Without addressing this aspect of the Student Opportunity Act funding challenge, districts with required increases in local contributions that exceed the percentage growth in their own local property tax revenues would be forced to cut funding for essential municipal services, a harmful zero-sum process that would weaken their capacity to deliver critical non-school services to students and families outside the classroom.

Budget-setting season is shifting into high gear at the State House and in every town and city. The key priorities outlined here will establish fiscal stability and sustainability at the local level and ensure that the residents of Massachusetts receive the essential municipal and school services they expect and deserve.
intended to provide savings for families, renters, seniors, farmers, and commuters.

The governor’s budget proposal is the first step in a months-long process to determine a final state budget. The House and Senate Ways and Means committees are expected to host a budget hearing in mid-March on municipal and school aid for fiscal 2024, and the House will debate its budget bill in April, with the Senate deliberating its own bill in May. The Legislature will work to get a final budget bill to the governor by the beginning of the fiscal year on July 1.

**Unrestricted General Government Aid**

Healey is proposing a $24.6 million increase (2%) in the Unrestricted General Government Aid account, slightly higher than the 1.6% consensus forecast for state tax revenue growth announced in January. The MMA will be working closely with lawmakers to build on this proposal and secure a higher level of UGGA aid to maintain essential municipal services.

“With inflation running far higher than 2%, communities will need a larger increase just to maintain existing programs and services,” Beckwith said.

**Chapter 70**

House 1 would continue implementation of the funding schedules in the Student Opportunity Act, bringing Chapter 70 school aid up to $6.58 billion. The majority of the funds would implement improvements to the foundation budget, adding weight for low-income students, English language learners, special education costs, and school employee health benefits.

An initial examination indicates, however, that 119 of 318 operating districts (37%) would receive only the minimum $30 per-student increase in the Student Opportunity Act. This translates into an average aid increase of just 0.7% for these districts, which serve 257,000 students.

The Legislature set minimum aid at $60 per student in the fiscal 2023 budget, and the MMA will continue to strongly advocate for minimum aid of $100 per student to ensure that all districts can at least keep pace with inflation and maintain their school services.

Healey’s budget also proposes a special $10 million reserve fund to provide relief to districts whose municipalities have been disproportionately impacted by increases in required local contributions under the Chapter 70 formula.

- See the Department of Elementary and Secondary Education’s calculation of fiscal 2024 Chapter 70 aid and net school spending requirements for individual cities, towns and regional school districts based on House 1.

**Charter school reimbursements**

House 1 would level-fund charter school reimbursements at $243 million, intended to meet the state’s statutory obligation to mitigate Chapter 70 losses to charter schools as outlined in the Student Opportunity Act.

While the proposed budget may meet the requirement, the MMA maintains that it does not solve the serious flaws in the overall charter school finance system.

“Charter schools will continue to divert a high percentage of Chapter 70 funds away from many municipally operated school districts, and place greater strain on the districts that serve the vast majority of public schoolchildren,” Beckwith noted. “Major problems will continue unless a true resolution of the charter school funding problem is achieved, which is a top MMA priority.”

**Special education circuit breaker**

House 1 would add $63 million to fund the Special Education Circuit Breaker program at $503 million. The Student Opportunity Act expanded the special education circuit breaker by including out-of-district transportation, an important enhancement for cities and towns. With concerns rising about a 14% rate increase for out-of-district special education providers coming on July 1, administration officials say they are examining funding options to assist local school districts, and the MMA will continue to work with the Executive Office for Administration and Finance and with lawmakers to address this challenge.

**Rural school aid**

House 1 includes $7.5 million for Rural School Aid for eligible towns and regional school districts. The grant program helps districts facing the challenge of declining enrollment to identify ways to form regional school districts or regionalize certain school services to create efficiencies.

The MMA sees this as a promising step for rural school aid, and will continue to advocate to build on this progress.

**Regional school transportation**

House 1 would increase funding for regional transportation reimbursements by $14.9 million, or about 18%, to $97 million for fiscal 2024, which would reimburse districts for approximately 90% of local costs.

**Out-of-district vocational school transportation**

Reimbursements for transportation of out-of-district vocational students would see a significant boost, with the governor proposing $5.2 million. The same account in fiscal 2023 was funded at only $250,000. The governor’s proposal would reimburse districts for approximately 90% of local costs.

**McKinney-Vento**

House 1 would fully fund reimbursements for the transportation of homeless students under the federal McKinney-Vento Act, increasing the account to $28.7 million in fiscal 2024. The impact of this funding level would vary from community to community, depending on the number of homeless families that remain sheltered in local hotels and motels.

**PILOT**

House 1 would increase payments-in-lieu-of-taxes by 14%, to $51.5 million, which would benefit communities with large amounts of state-owned land. This increase is intended to ensure that no municipality sees a decrease in its overall PILOT payments due to recent valuation changes.

**Public libraries**

Local aid accounts for public libraries and regional libraries would each receive a 10% increase under House 1, bringing public libraries to $17.6 million and regional libraries to $15.9 million.

**Shannon grants**

House 1 includes $12.3 million for the Shannon Community Safety Initiative grant program, which provides funding for cities and towns to respond to and suppress gang-related activities.
Regionalization efficiencies reserve

House 1 includes $20.5 million for a Municipal Regionalization Efficiencies Incentive Reserve, which would double the funding for the Community Compact Program. Part of the reserve would be used to support emergency public safety staffing grants ($5 million), the District Local Technical Assistance Fund ($3 million), the Efficiency and Regionalization competitive grant program ($2 million), and the Local Finance Commonwealth Fellowship Program ($500,000).

Municipal transportation grants

In response to calls from municipalities for state support with the design and development of key transportation-related projects, House 1 proposes $100 million for a new Massachusetts Department of Transportation Municipal Partnership grant program. The grants would help communities prepare for or apply for state and federal grant programs, fulfill local match requirements, begin construction, or leverage outside funding sources. The grant account would be funded with a portion of the $1 billion in new revenue generated by the surtax on incomes above $1 million.

Tax relief

The governor’s fiscal 2024 spending plan includes a $859 million set aside for tax relief. The governor’s proposal would fund several categories of tax credits, resulting in the following budget impacts for fiscal 2024:

- Child and family tax credit: $458 million
- Estate tax: $167 million
- Renter deduction: $40 million
- Senior circuit breaker credit: $60 million
- Short-term capital gains: $117 million
- Additional targeted credits: $17 million

Fair Share

In House 1, the governor said she is recommending a mechanism to ensure that revenue from the surtax on incomes above $1 million is “used in a manner that is sustainable and protected against future downturns and fluctuations in the revenue stream.”

The proposal recommends the establishment of a required minimum fund balance that would be used only in the event of significant revenue decline to preserve base programs funded from Fair Share tax revenue. This balance would grow annually to account for inflation.

To ensure predictability, a cap would be established on recurring spending, with revenue collected above the cap used to support one-time investments in pilot programs, start-up grants, studies, one-time capital investments such as bridges, railroad right-of-way improvements, and other non-recurring projects.

In House 1, Healey recommends using $1 billion in investments from Fair Share revenue in fiscal 2024 — $510 million for education and $490 million for transportation.

The proposal includes $140 million for early education and care, $10 million for K-12 education (specifically for Early College and Innovation Pathways), and $360 million for higher education programs, as well as $100 million for the new MassDOT municipal grant program, $186 million for the MBTA, $164 million for MassDOT Highway, and $40 million for MassDOT Transit and Rail.

On Feb. 15, Gina Dario became the new town administrator in Lanesborough. Dario has more than two decades of experience as an elections observer and official overseas. For the past 18 years, she served in the Australian Electoral Commission in Canberra, in roles including assistant director, director and assistant commissioner. She has also served as a consultant for the International Elections Administration and as an advisor for the Australian Electoral Commission Election Indonesia Program in Jakarta, Indonesia; as an election observer in the Russian Federation in 2003; as a project officer for the East Timorese and International Observer Groups in Dili, East Timor, in 2001 and 2002; and as a polling station officer in Kosovo in 2001. She also served as an associate political affairs officer for the United Nations from 2000 to 2001. More locally, she was a project manager for the International Executive Service Corps in North Adams from 2003 to 2004.

Dario has a bachelor’s degree in foreign languages and literatures from Mount Holyoke College, and a master’s degree in international relations and affairs from Columbia University.

In Lanesborough, Dario replaces Joshua Lang, who left the position in September.

Mark Stankiewicz became the new town administrator in Berkley on Feb. 14. Stankiewicz gained municipal experience throughout southern New England. For the past decade, he was the town administrator in Charlestown, Rhode Island. Before that, he served for three years as the town manager in Plymouth, more than six years as the town manager in Stoughton, and a decade as the town administrator in Webster. He also served as the assistant city manager in Norwich, Connecticut, from 1988 to 1993. He has a bachelor’s degree in political science and government and a master’s degree in public administration, both from the University of Connecticut.

In Berkley, Stankiewicz replaces Heather Martin-Sterling, who left the position in June. Kevin Partridge had been serving as the interim town administrator.

Attleboro City Councillor Cathleen DeSimone won a special election on Feb. 28 to serve as mayor for the rest of the year, following the departure of Paul Heroux, who left to become the Bristol County sheriff in January. James DiLisio has been serving as acting mayor.

Shawn Oliver won a special election on Feb. 28 to join the New Bedford City Council representing Ward 3. Oliver is filling the vacancy left by the resignation of Hugh Dunn in December.

Christine Lindberg became chief of staff to Haverhill Mayor James Fiorentini on Jan. 23. Lindberg had been serving as the town administrator in Ashby since February 2022. Previously, she served as human resources director in Dracut from June 2017 until November 2021, and for four years as chief aide to the town manager in Salisbury and three years as assistant to the town manager in Hamilton. She served for nine years on the Middleton Select Board and served on the Middleton Planning Board from 2001 to 2016.

Lindberg has a master’s degree in public administration from Suffolk University and a bachelor’s degree in political science from Salem State University. She completed the MMA-Suffolk University Certificate in Local Government Leadership and Management program in 2012-2013.

In Haverhill, Lindberg replaces Christopher Sicuranza, who stepped down from the role in December.

James Devine won a Feb. 7 special election to join the Quincy City Council. He is filling the Ward 4 seat left vacant by Brian Palmucci, who resigned late last year following his appointment as a state District Court judge.

William Harker and Jared Bellows have joined the Charlemont Select Board after winning a Jan. 10 special election. Harker fills a seat left vacant by Marguerite Willis and will serve the remaining five months of that term. Bellows fills a seat left vacant by Dan Girard and is serving the remaining year and a half of that term. Willis and Girard both resigned on Dec. 30.

Abbe Burt joined the Tisbury Select Board after winning a Jan. 24 special election. Burt fills a seat left vacant by the resignation of Larry Gomez in October.

Alec Rich joined the Norton Select Board after winning a Feb. 11 special election. He fills a seat left vacant by the resignation of Christine Deveau in November.

Paul Tassone joined the Gardner City Council on Feb. 6, when the council chose him to fill the Ward 3 seat left vacant by the resignation of Nathan Boudreau in December.

Former Boston Mayor Martin Walsh, who has served as the U.S. secretary of labor for the past two years, is stepping down from his cabinet post to become executive director of the NHL Players’ Association later this month.

The U.S. Senate confirmed Walsh’s appointment as labor secretary in March 2021, ending his seven-year tenure as Boston’s mayor. Previously, he served for 16 years as a state representative for the
Edward Coppinger, state representative, after more than a decade serving as a construction unions.

Council, an umbrella organization of local Boston’s Building and Construction Trades Boston, and from 2011 to 2013 he led Boston’s Building and Construction Trades Council, an umbrella organization of local construction unions.

As a former laborer, Walsh has extensive experience in union and labor issues. He rose through his union’s ranks to become president of the Laborers Local 223 in Boston, and from 2011 to 2013 he led Walsh’s term as president of the Laborers Local 223 in Boston.

People

13th Suffolk District, which includes parts of Boston and Quincy.

As a former laborer, Walsh has extensive experience in union and labor issues. He rose through his union’s ranks to become president of the Laborers Local 223 in Boston, and from 2011 to 2013 he led Boston’s Building and Construction Trades Council, an umbrella organization of local construction unions.

Edward Coppinger

Until recently, he had served as a co-chair of the Joint Committee on Community and Small Businesses. Previously, he worked as a residential mortgage loan officer.

Malcolm Driscoll, who served for almost three decades as Watertown’s mayor until his retirement in early 2022, died on Feb. 11 at age 70.

Driscoll spent 45 years working in Watertown, starting as the skating rink manager, a role he held from 1977 to 1985, followed by eight years as the treasurer/collector and parking clerk. In 1993, he became Watertown’s town manager, and, with the town’s recent transition to a city form of government, he ended his tenure as its city manager.

Robert Whynott, a longtime public servant in Gloucester, died on Feb. 3 at age 77.

A lifelong Gloucester resident, Whynott served two terms on the City Council in the 1980s. He then served for 17 years as city clerk until his retirement in 2009.

After leaving the clerk’s office, he was re-elected to the council and served another three terms. He had also been a part-time deputy sheriff for the Essex County Sheriff’s Department, and was a Justice of the Peace until the end of his life.

Anthony Troiano, who served in several municipalities over the course of two decades, died on Feb. 7 at age 67.

Troiano served as town manager in Hopkinton from 2006 to 2008, after serving as the assistant town administrator in Burlington for two years. He also served for 15 years as the chief ranger and property manager for the town of Barnstable. Since 2008, he was the president of Troiano Consulting.

John Olver, a champion of western Massachusetts on both Beacon Hill and Capitol Hill, died on Feb. 23 at age 86.

Olver represented the region for more than four decades on the state and then national level. He became a state representative in 1969, and was elected to the state Senate in 1972, where he served for nearly two decades. He was elected to Congress in 1991 in a special election to fill the seat left vacant by the death of Rep. Silvio Conte, and he represented the First Congressional District until his retirement in 2013.

This monthly column highlights transitions, accomplishments and awards, and life events of municipal officials. To submit information for People, contact MMA Associate Editor Jennifer Kavanaugh at 800-882-1498 or jkavanaugh@mma.org.

Send personnel changes to the MMA

Retirements, elections, resignations andhirings bring about frequent changes in a community’s personnel. Keep the MMA up-to-date with your community’s personnel changes by sending an email to database@mma.org. Please include the person’s name, title, and start date. If you have any questions, contact the MMA database administrator.

Note: The MMA is advising in-person meeting attendees to keep up with the latest COVID vaccines for which they are eligible. We highly recommend that attendees take an at-home rapid antigen test prior to attending, and not attend if they have any COVID symptoms or if a household member has tested positive for COVID. These protocols are subject to change based on the latest public health data and guidance.
